All of our custom products are proudly made in America.

Many thanks to the staff of Designer Custom Source for their hard work and guidance while producing the 2012 Workroom Catalog. Without their contributions and direction, this book would not be possible.

We hope you find the DCS Workroom Catalog a useful tool, and we look forward to working with you on your projects and any special requests you may have. We enjoy adding new products to our site to ensure a one-stop shopping experience for you, so please visit us at www.DesignerCustomSource.com for the most comprehensive list of products, and complimentary accoutrements. Please note that prices and product specifications are subject to change.

CUSHIONS

Multiple styles to select from, plus the addition of your custom template, make our cushion division offering significant. We have had thousands of satisfied clients, and we want you to sit back and relax with confidence, knowing that you will be providing an excellent custom product to your client.

BENCH CUSHIONS

DESIGNER CUSTOM SOURCE offers premium outdoor living cushions and an assortment of fabrics, including Sunbrella®, Robert Allen®, Geobella™, and Outdura®. We select our fabrics based on their reputation in the marketplace, durability, ease of care and warranties. Of course, as with all fabrics, proper care will extend the life of the product.

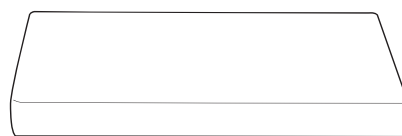

We believe that what is on the inside is as important as what is on the outside. For outdoor cushions, we recommend our Standard Outdoor fill: CumuPlush, which is a special blend of polyester fibers designed to withstand the elements and retain its shape and resiliency longer than standard densified polyfiber. It's a unique material because it will not retain water, which helps prevent the growth of mold or mildew. For indoor cushions, we provide the following choices: Standard Outdoor (CumuPlush), Standard Indoor (Bio Comfort®, which is a firmer and denser fill), and Premium Indoor (Bio Comfort® foam with polyfiber batting on top and bottom for a plush look and feel). We offer a measurement guide for the following cushion styles: bench, chair, seat, window seat, chaise lounge, ottoman, deep seating, as well as overstuffed cushions for wicker, rattan, and settees.

We pride ourselves in creating beautiful custom cushions using the templates you provide. **Because our cushions are made in half-inch width and depth increments, please round to the nearest half-inch. Measuring, at this point, is critical. To ensure a proper fit, please follow the Cushion Measuring Guides found in the back of this section.**

At Designer Custom Source, we can custom-make any type of chair cushion. **If you have a unique chair that will require something other than our standard sizes, please refer to the Cushion Measuring Guides found in the back of this section.**

A. Style Options

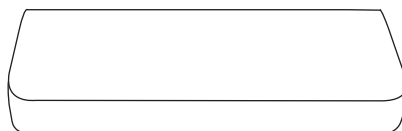

SHAPE OPTIONS

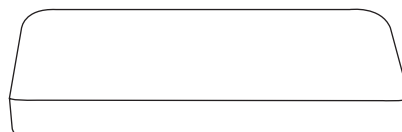

RECTANGLE

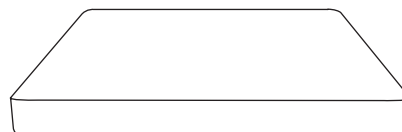

STANDARD ROUNDED CORNERS

STANDARD ROUNDED FRONT CORNERS

STANDARD ROUNDED BACK CORNERS

TRAPEZOID

CUSTOM SHAPE

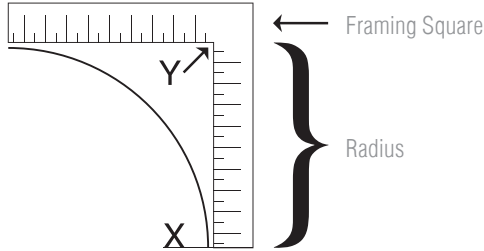

CORNER OPTIONS

Square Corners

- Fabric is cut at a 90° angle with ½” seam allowance.

Rounded Corners

- All standard radii are 4”.
- Trapezoids use a 1”-1 ½” radius on the smallest angles and standard 4” radii for the opposite angles.

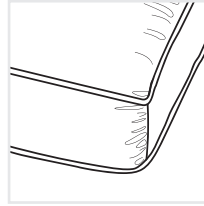

- What this means is that if you take a framing square and place it so that it is along the edges of your corners (see image above) and measure from where the curve starts to the corner of the square, that measurement will be the radius of your cushion’s corners. Most furniture with rounded corners will conform to these specifications. If you require a different radius, please order a custom shaped cushion.
- **Note:** Due to the sewing style required, rounded cushions can only have boxed edges.

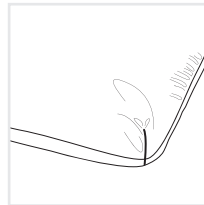

B. Edging Options

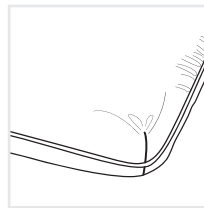

BOX EDGE

DOUBLE CORD BOX EDGE

KNIFE EDGE

SINGLE CORD KNIFE EDGE

C. Fill Options

FILL OPTIONS

STANDARD OUTDOOR

Flat style fill designed specifically for outdoor use. Our CumuPlush brand is made with a special blend of poly fiber that is bonded together for comfort and resiliency.

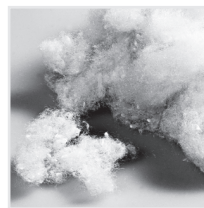

PREMIUM INDOOR

Bio Comfort® foam with 1” batting on the top and bottom. This will result in an additional 1”-2” of thickness due to the loft created by the batting.

STANDARD INDOOR

Flat style Bio Comfort® foam designed to remain firm and resilient. Indoor use only.

DIRECT FILL

Filled with loose poly fiber.

TUFTED OPTION

General Information

- Only available for Premium Indoor (2"-8" thick) and Direct Fill (3" and 5" thick) fill options.
- We offer one button size option — 1" (25mm) — with an indention target of 1"-2".

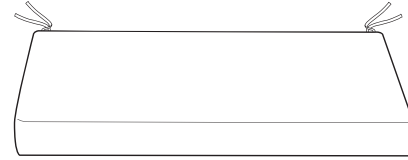

Placement and Symmetry General Guidelines

- For Premium Indoor filled cushions, there is a minimum of 4 buttons per cushion regardless of size.
- **Standardized Button Placement:** Equal distance between buttons, as well as their placement relative to the cushion's edge.
 - Number of rows is determined by taking the depth and dividing it by 8", rounding down to the nearest whole number.
 - Number of buttons is determined by taking the width and dividing by 8", rounding down to the nearest whole number.
 - For trapezoidal cushions, the number of buttons is determined by adding the short and long widths; dividing their sum by 2; and then dividing that total by 8", rounding down to the nearest whole number. This is the number of buttons in the short row. Add 1 button for the long row, and for each additional row, add 1 button.
- **Customized Button Placement:** Please submit a template showing each button's placement.

TIES ON THE LEFT AND RIGHT SIDES

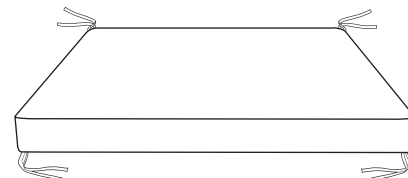

Tie Options for Trapezoid Cushions

NO TIES

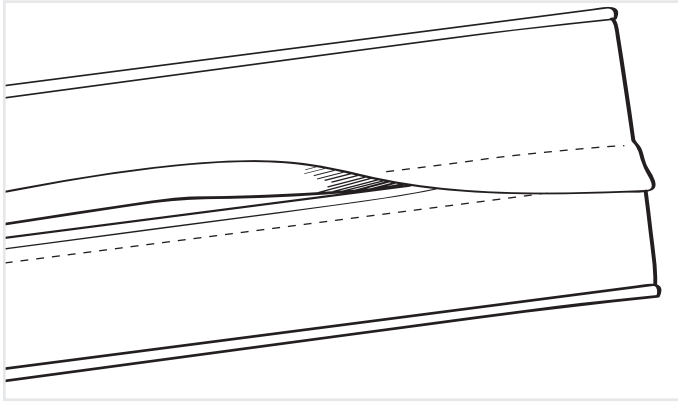

TIES ON THE BACK CORNERS

TIES ON FOUR CORNERS

E. Zipper Options

All Standard and Premium filled cushions come with “hidden” zippers. Direct Fill cushions are sewn shut.

Zippers are made of nylon and come in one of three colors: beige, white, or black.

F. Thickness Options

All cushions have the option of being 2”-8” in thickness, with the exception of knife edge, which allows only 2”-3” thickness.

G. Other Notes

KNIFE EDGE RESTRICTIONS

Knife edge and single cord knife edges are only available on cushions that are 2” or 3” in thickness. Any cushions 4” or greater in thickness must have boxed edges.

DIRECT FILL CUSHIONS

All cushions with Direct Fill must be tufted.

EXTRA-LONG CUSHIONS

All cushions that exceed 106” in length will be folded at half the length to allow for easier shipment. Cushions that are folded will take time to settle out. If you would prefer your cushion shipped flat, we recommend calling our office at 800.510.8325 and requesting your cushion not to be folded. Please note this will incur higher shipping fees. You may also want to consider ordering two separate cushions for your furniture if your project exceeds 106” in length. This can be accomplished by dividing your total length by two. **Note: All cushions 5” in thickness or greater cannot be folded and will require additional shipping fees.**

CUSTOM SHAPE CUSHIONS

If you have a unique cushion that will require something other than our standard shapes, please refer to the Cushion Measuring Guides found in the back of this section.

MAXIMUM CUSHION DIMENSIONS

Cushions can be made up to 120” wide and 80” deep.

DIRECTIONAL FABRICS

We run all directional fabrics vertical (front to back) on a product unless otherwise stated. Please note that vertical run fabrics may cause seams on cushions longer than 50”.

C. Fill Options

FILL OPTIONS – BACK AND SEAT

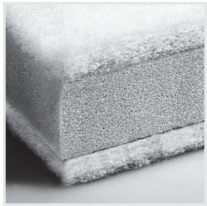

STANDARD OUTDOOR

Flat style fill designed specifically for outdoor use. Our CumuPlush brand is made with a special blend of poly fiber that is bonded together for comfort and resiliency.

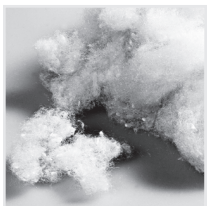

STANDARD INDOOR

Flat style Bio Comfort® foam designed to remain firm and resilient. Indoor use only.

PREMIUM INDOOR

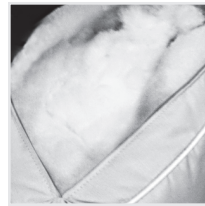

Bio Comfort® foam with 1” batting on the top and bottom. This will result in an additional 1”-2” of thickness due to the loft created by the batting.

DIRECT FILL

Filled with loose poly fiber.

FILL OPTIONS – BACK ONLY

PLUSH

Plush style fill consists of two sheets of batting sandwiching a loose poly fiber fill. The batting gives the necessary rigidity for holding the cushion’s shape, while the loose poly fiber offers a luxurious, “plush” appeal.

TUFTED OPTION

General Information

- Only available for Premium Indoor (2”-8” thick) and Direct Fill (3” and 5” thick) fill options.
- We offer one button size option — 1” (25mm) — with an indentation target of 1”-2”.

Placement and Symmetry General Guidelines

- **Number of Buttons:** For Premium Indoor filled cushions, there is a minimum of 4 buttons per cushion regardless of size. “Plush” back cushion button options: no buttons, 1 button, 4 buttons, or 5 buttons.
- **Standardized Button Placement:** Equal distance between buttons, as well as their placement relative to the cushion’s edge.
 - Number of rows is determined by taking the depth and dividing it by 8”, rounding down to the nearest whole number.
 - Number of buttons is determined by taking the width and dividing by 8”, rounding down to the nearest whole number.

C. Tufted Option continued

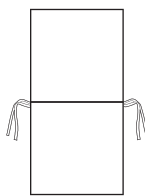

- For trapezoidal cushions, the number of buttons is determined by adding the short and long widths; dividing their sum by 2; and then dividing that total by 8", rounding down to the nearest whole number. This is the number of buttons in the short row. Add 1 button for the long row, and for each additional row, add 1 button.
- Back cushion button placements:
 - » 1 Button: centered.
 - » 4 Buttons: equidistant and centered in a box or diamond pattern.
 - » 5 Buttons: 4 buttons equidistant and centered in a box or diamond pattern, with the last button centered inside the 4-button pattern.
- **Customized Button Placement:** Please submit a template showing each button's placement.

E. Connection Options

JOINING PIECE

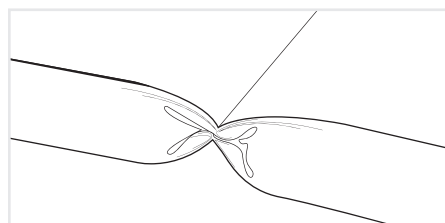

- Required on all cushions 5” thick or greater
- Finished joining piece should be 2” wide on all cushions 4” or greater in thickness; 1” wide on cushions 2” or 3” thick.

JOINING PIECE

PINCHED

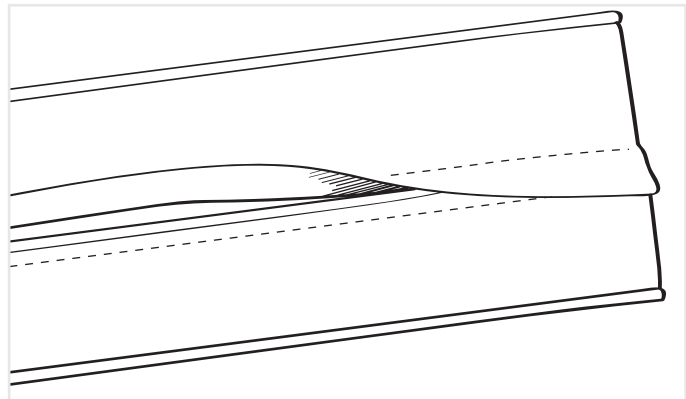

- Only available on cushions 4” or less in thickness.
- Use the same amount of fabric for the ease (or “take up”) as the thickness of the cushion.
 - For example: A 3” cushion will use 3” of fabric for the *ease* — the gap of fabric between the cushions that are to be joined.

PINCHED

F. Zipper Options

All Standard and Premium filled cushions come with “hidden” zippers. Direct Fill cushions are sewn shut.

Zippers are made of nylon and come in one of three colors: beige, white, or black.

G. Thickness Options

SINGLE & DOUBLE CHAISE CUSHIONS

Chaise lounge chairs are typically used in outdoor patio settings. Most chaise cushions are 3”-4” in thickness and are most commonly made with boxed edge styling or boxed with double cording styling. Chaises can be either single or double. Chaise cushions contain 1-3 breaks — separate cushions that are joined either with single or multiple pieces of fabric or joined with a pinched pleat seam.

Double Chaise Cushion

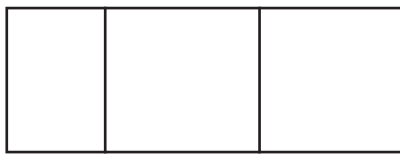

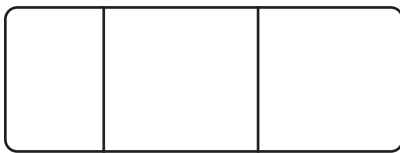

STEAMER CUSHIONS

A. Style Options

SHAPE OPTIONS

RECTANGLE
(2 BREAKS)

ROUNDED
CORNERS
(2 BREAKS)

CUSTOM
SHAPE
(2 BREAKS)

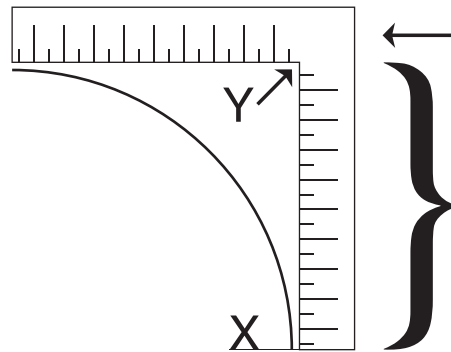

CORNER OPTIONS

Square Corners

Fabric is cut at a 90° angle with 1/2" seam allowance.

Rounded Cushions

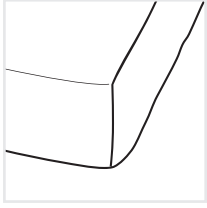

All standard radii on rounded corner cushions are 4".

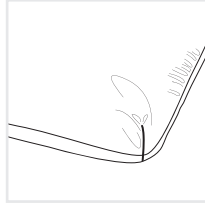

What this means is that if you take a framing square and place it so that it is along the edges of your corners (see image above) and measure from where the curve starts to the corner of the square, that measurement will be the radius of your cushion's corners. Most furniture with rounded corners will conform to these specifications. If you require a different radius, please order a custom shaped cushion.

Note: Due to the sewing style required, rounded cushions can only have boxed edges.

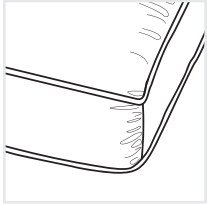

B. Edging Options

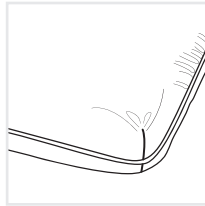

BOX EDGE

KNIFE EDGE

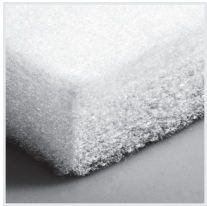

DOUBLE CORD BOX EDGE

SINGLE CORD KNIFE EDGE

C. Fill Options

FILL OPTIONS

STANDARD OUTDOOR

Flat style fill designed specifically for outdoor use. Our CumuPlush brand is made with a special blend of poly fiber that is bonded together for comfort and resiliency.

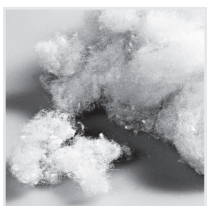

STANDARD INDOOR

Flat style Bio Comfort® foam designed to remain firm and resilient. Indoor use only.

PREMIUM INDOOR

Bio Comfort® foam with 1" batting on the top and bottom. This will result in an additional 1"-2" of thickness due to the loft created by the batting.

DIRECT FILL

Filled with loose poly fiber.

TUFTED OPTION

General Information

- Only available for Premium Indoor (2"-8" thick) and Direct Fill (3" and 5" thick) fill options.
- We offer one button size option — 1" (25mm) — with an indentation target of 1"-2".

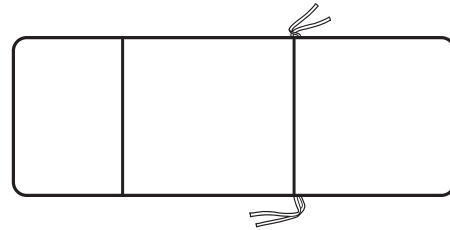

Placement and Symmetry General Guidelines

- For Premium Indoor filled cushions, there is a minimum of 4 buttons per cushion regardless of size.
- **Standardized Button Placement:** Equal distance between buttons, as well as their placement relative to the cushion's edge.
 - Number of rows is determined by taking the depth and dividing it by 8", rounding down to the nearest whole number.
 - Number of buttons is determined by taking the width and dividing by 8", rounding down to the nearest whole number.
- **Customized Button Placement:** Please submit a template showing each button's placement.

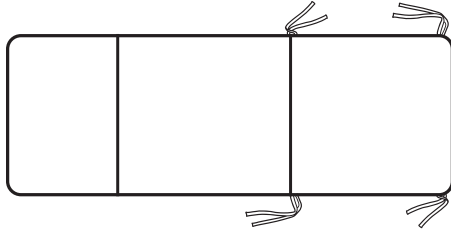

D. Tie Options

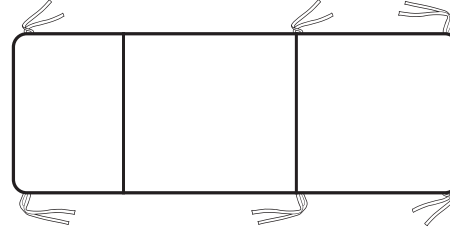

NO TIES

TIES ON THE FIRST BREAK

TIES ON THE TOP CORNERS AND THE FIRST BREAK

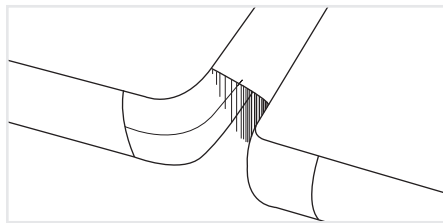

TIES ON FOUR CORNERS AND THE FIRST BREAK

E. Connection Options

JOINING PIECE

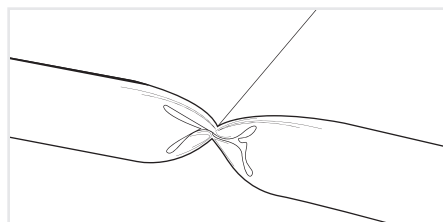

- Required on all cushions 5" thick or greater
- Finished joining piece should be 2" wide on all cushions 4" or greater in thickness; 1" wide on cushions 2" or 3" thick.

JOINING PIECE

PINCHED

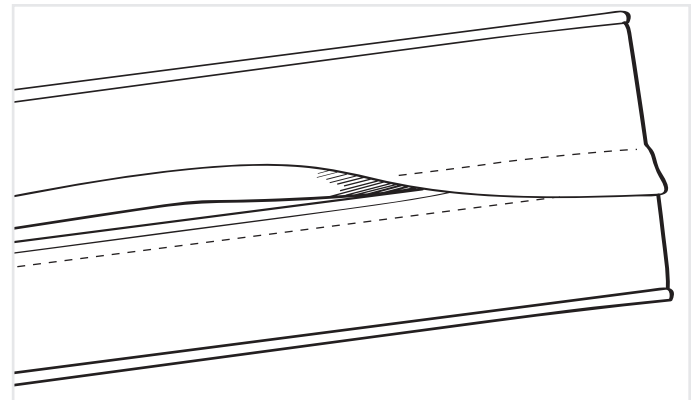

- Only available on cushions 4" or less in thickness.
- Use the same amount of fabric for the ease (or "take up") as the thickness of the cushion.
 - For example: A 3" cushion will use 3" of fabric for the *ease* — the gap of fabric between the cushions that are to be joined.

PINCHED

F. Zipper Options

All standard and premium filled cushions come with "hidden" zippers. Direct Fill cushions are sewn shut.

Zippers are made of nylon and come in one of three colors: beige, white, or black.

G. Thickness Options

All cushions have the option of being 2"-8" in thickness, with the exception of knife edge, which allows only 2"-3" thickness.

H. Other Notes

KNIFE EDGE RESTRICTIONS

Knife edge and single cord knife edges are only available on cushions that are 2" or 3" in thickness. Any cushions 4" or greater in thickness must have boxed edges.

EXTRA-LONG CUSHIONS

All cushions that exceed 106” in length will be folded at half the length to allow for easier shipment. Cushions that are folded will take time to settle out. If you would prefer your cushion shipped flat, we recommend calling our office at 800.510.8325 and requesting your cushion not to be folded. Please note this will incur higher shipping fees. You may also want to consider ordering two separate cushions for your furniture if your project exceeds 106” in length. This can be accomplished by dividing your total length by two. **Note: All cushions 5” in thickness or greater cannot be folded and will require additional shipping fees.**

CUSTOM SHAPE CUSHIONS

If you have a unique cushion that will require something other than our standard shapes, please refer to the Cushion Measuring Guide pages found in the back of this section.

MAXIMUM CUSHION DIMENSIONS

Cushions can be made up to 120” wide and 80” deep.

DIRECTIONAL FABRICS

We run all directional fabrics vertical (front to back) on a product unless otherwise stated. Please note that vertical run fabrics may cause seams on cushions longer than 50”.

Filled with loose poly fiber.

FILL OPTION – BACK-ONLY

PLUSH

Plush style fill consists of two sheets of batting sandwiching a loose poly fiber fill. The batting gives the necessary rigidity for holding the cushion’s shape, while the loose poly fiber offers a luxurious, “plush” appeal.

TUFTED OPTION

General Information

- Only available for Premium Indoor (2”-8” thick) and Direct Fill (3” and 5” thick) fill options.
- We offer one button size option — 1” (25mm) — with an indentation target of 1”-2”.

Placement and Symmetry General Guidelines

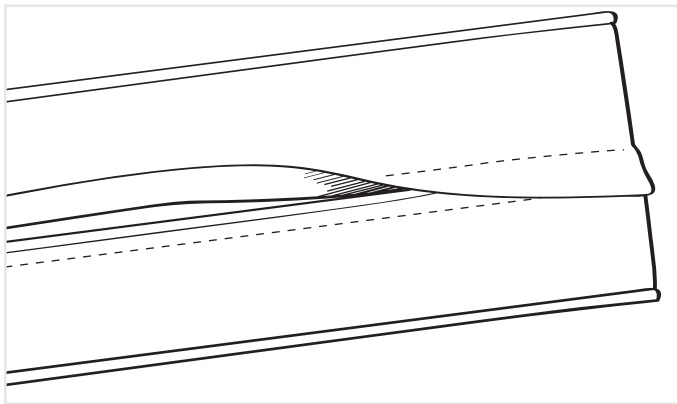

- **Number of Buttons:** For Premium Indoor filled cushions, there is a minimum of 4 buttons per cushion regardless of size. “Plush” back cushion button options: no buttons, 1 button, 4 buttons, or 5 buttons.
- **Standardized Button Placement:** Equal distance between buttons, as well as their placement relative to the cushion’s edge.
 - Number of rows is determined by taking the depth and dividing it by 8”, rounding down to the nearest whole number.
 - Number of buttons is determined by taking the width and dividing by 8”, rounding down to the nearest whole number.

D. Tufted Option continued

- For trapezoidal cushions, the number of buttons is determined by adding the short and long widths; dividing their sum by 2; and then dividing that total by 8", rounding down to the nearest whole number. This is the number of buttons in the short row. Add 1 button for the long row, and for each additional row, add 1 button.
- Back cushion button placements:
 - » 1 Button: centered.
 - » 4 Buttons: equidistant and centered in a box or diamond pattern.
 - » 5 Buttons: 4 buttons equidistant and centered in a box or diamond pattern, with the last button centered inside the 4-button pattern.
- **Customized Button Placement:** Please submit a template showing each button's placement.

E. Zipper Options

All Standard and Premium filled cushions come with "hidden" zippers. Direct Fill only cushions are sewn shut.

Zippers are made of nylon and come in one of three colors: beige, white, or black.

F. Thickness Options

All cushions have the thickness options of 3", 5", or 7".

G. Other Notes

KNIFE EDGE RESTRICTIONS

Knife edge and single cord knife edges are only available on cushions that are 3" in thickness. Any cushions 4" or greater in thickness must have boxed edges.

CUSHION MEASURING GUIDES

We offer a custom measurement cushion guide for the following cushion styles: bench, window seat, chair, and chaise lounge, as well as overstuffed cushions for wicker, rattan, and settees.

We pride ourselves in creating beautiful custom cushions using the templates you provide. Because our cushions are made in half-inch width and depth increments, please round to the nearest half inch. Measuring, at this point, is critical. To ensure a proper fit, please follow the guide below. Please note: when using an existing seat cushion, use a straight ruler to get an accurate measurement.

DEPTH (Front to Back)

When measuring depth, start at the front of the seat and measure backward to the back.

WIDTH (Side to Side)

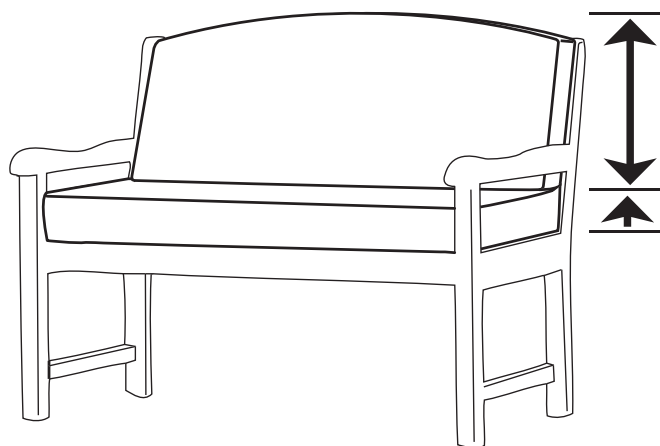

When measuring width, measure side to side. This will provide us with an outer dimension of your cushion.

THICKNESS

Determine the thickness you want in 1" increments. Cushion thickness choices range from 2" to 8".

Chair Cushions

Note: Remember to subtract the thickness of the bottom from the length of the back cushion. Please measure all chair cushions carefully, paying close attention to special shapes and sizes.

Wicker Cushions, Rattan, Settee (Overstuffed)

Your template will be required for all wicker furniture cushions.

Reference the cushion template steps on the next page to ensure you receive a proper fit.

Please provide a template to define your specific cushion shape, as well as the outer cushion dimensions, to ensure accurate pricing and fit.

Note: Widths vary from the front and back. Please check both ends to confirm your measurement.

Creating a Cushion Template

If your cushion is NOT square, rectangular, or a shape shown online, it will require a template. Please use thick butcher paper or cloth to create a reliable template.

TEMPLATE INFORMATION

Write the following information on your template:

- Full Name
- Invoice Number
- Thickness
- Quantity
- Fabric Choice (Specify which side if reversible)
- Cording Option
- Zipper Location
- Tie and Break Locations

As cushions and fabrics age, the shape of a cushion can become less than symmetrical. To ensure a symmetrical template, fold it down the middle and cut as needed to balance the pattern. Double-check your new template with your furniture.

MAIL YOUR TEMPLATE TO:

Designer Custom Source
Attn: Template Order
3180 Wetumpka Highway
Montgomery, AL 36110

Existing cushion shells cannot be used as templates.

How to Create a Pattern From an Existing Cushion

STEP 1

Place your cushion on top of thick butcher paper or cloth.

STEP 2

Trace around the cushion and cut out the shape.

STEP 3

Test your template for fit. If adjustments are needed, please make sure to securely tape the paper together. Only one pattern is needed for each cushion shape.

How to Create a Template from Your Furniture (Without a Cushion)

STEP 1

Lay out a sheet of paper on the furniture piece. Firmly press the paper flat to fit the outside edges of your furniture.

STEP 2

Trace the outside edges to match your new cushion shape. This template becomes the exact shape and size of your custom-made cushion.

STEP 3

Once your pattern has been cut, test for an accurate fit. If adjustments are needed, please make sure to securely tape the paper together. Only one pattern is needed for each cushion shape. Please double-check all measurements.

FABRIC YARDAGE GUIDE

How to Determine Fabric Requirements

LENGTH

Length is the sum of the longest side's measurement; the product of your thickness multiplied by 2; and the product of multiplying the number of breaks by thickness, then by 2. If ties, include an additional 2".

DEPTH

If the sum of the depth's (short side) measurement and the thickness is greater than 25", double the fabric allot for your "length" measurement above.

If the sum of the depth's measurement and the thickness is greater than 52", then multiply the width by 2.6.

This is considered your "adjusted depth."

FABRIC REPEATS

"X" equals the horizontal measurement of a fabric repeat.
"Y" is the vertical measurement of a fabric repeat.

When the sum of X and Y is greater than 2" and less than or equal to 14", multiply its adjusted depth by 1.1.

When the sum of X and Y is greater than 14" and less than or equal to 19", multiply its adjusted depth by 1.15.

When the sum of X and Y is greater than 19" and less than or equal to 27", multiply its adjusted depth by 1.2.

When the sum of X and Y is greater than 27" and less than or equal to 36", multiply its adjusted depth by 1.25.

When the sum of X and Y is greater than 36" and less than or equal to 45", multiply its adjusted depth by 1.3.

When the sum of X and Y is greater than 45", multiply its adjusted depth by 1.35.

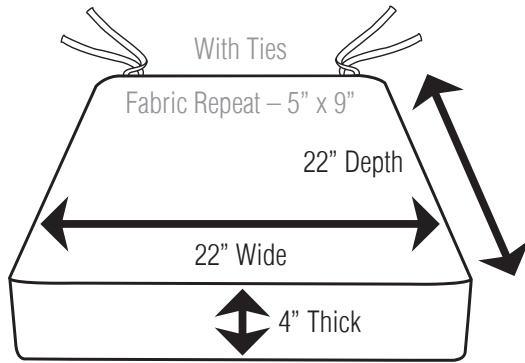

Treat cording separate regardless if it is the same as the main fabric and order a minimum of 1 yard.

DIRECTIONAL FABRICS

We run all directional fabrics vertical (front to back) on a product unless otherwise stated. Please note that vertical run fabrics may cause seams on cushions longer than 50".

Fabric Yardage Measurement Examples

SEAT CUSHION

Length

$22''$ (longest side) + $8''$ ($4''$ thickness x 2) + $2''$ (ties) = $32''$ Length

Depth

$22''$ (short side) + $4''$ (thickness) = $26''$ Depth
Since $26''$ is greater than $25''$, double its length to $64''$ (adjusted length).

Fabric Repeat

$5'' + 9''$ equals $14''$, thus you will multiply your adjusted length by 1.1 for a total of $70.40''$. Divide $70.40''$ by $36''$ for a total of 1.96 yards. Round this number to 2 yards.

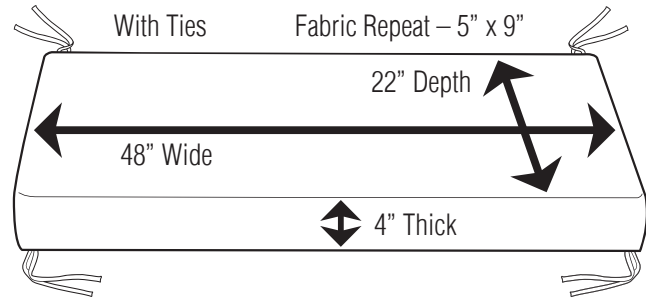

Cording

Provide 1 yard.

Total Amount of Fabric

Send a total of 3 yards.

BENCH CUSHION

Length

$48''$ (longest side) + $8''$ ($4''$ thickness x 2) + $2''$ (ties) = $58''$ Length

Depth

$22''$ (short side) + $4''$ (thickness) = $26''$ Depth
Since $26''$ is greater than $25''$, double its length to $116''$ (adjusted length).

Fabric Repeat

$5'' + 9''$ equals $14''$, thus you will multiply your adjusted length by 1.1 for a total of $127.6''$. Divide $127.6''$ by $36''$ for a total of 3.54 yards. Round this number to 4 yards.

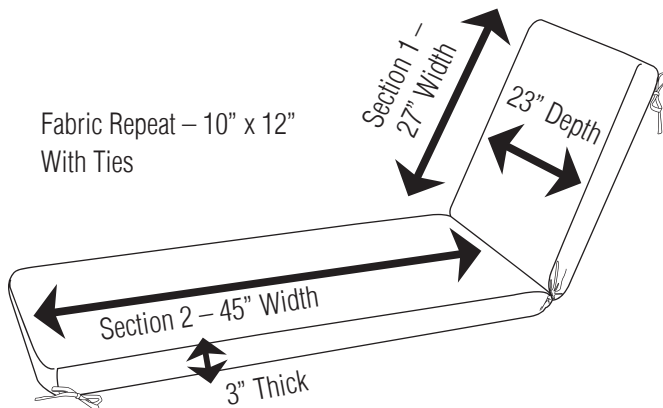

Cording

Provide 1 yard.

Total Amount of Fabric

Send a total of 5 yards.

CHAISE CUSHION

Fabric Repeat – 10" x 12"
With Ties

Length

72" (27" + 45", longest side) + 6" (3" thickness x 2) + 6" (1 break x 3" thickness x 2) + 2" (ties) = 86" Length

Depth

23" (short side) + 3" (thickness) = 26" Depth
Since 26" is greater than 25", double its length to 172" (adjusted length).

Fabric Repeat

10" + 12" equals 22", thus you will multiply your adjusted length by 1.2 for a total of 206.4". Divide 206.4" by 36" for a total of 5.73 yards. Round this number to 6 yards.

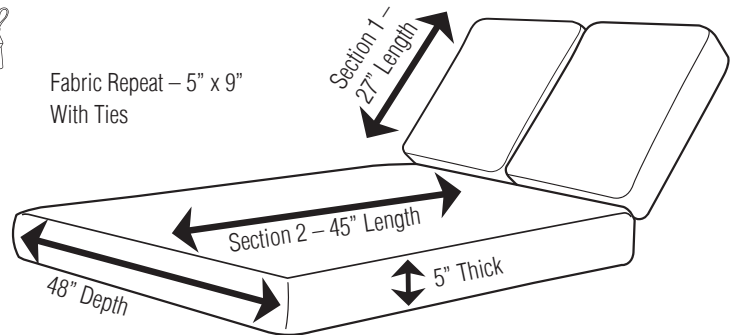

Cording

Provide 1 yard.

Total Amount of Fabric

Send a total of 7 yards.

DOUBLE CHAISE CUSHION

Fabric Repeat – 5" x 9"
With Ties

Length

72" (27" + 45", longest side) + 10" (5" thickness x 2) + 10" (1 break x 5" thickness x 2) + 2" (ties) = 94" Length

Depth

48" (short side) + 5" (thickness) = 53" Depth
Since 53" is greater than 52", multiply its length by 2.6 to equal 244.4" (adjusted length).

Fabric Repeat

5" + 9" equals 14", thus you will multiply your adjusted width by 1.1 for a total of 268.8". Divide 268.8" by 36" for a total of 7.47 yards. Round this number to 8 yards.

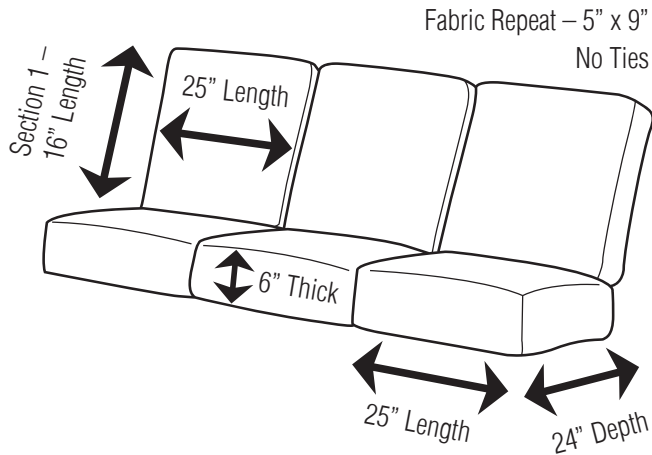

Cording

Provide 1 yard.

Total Amount of Fabric

Send a total of 9 yards.

DEEP SEATING SOFA

Length

25" (longest side) + 12" (6" thickness x 2) = 37" Length

Depth

24" (short side) + 6" (thickness) = 30" Depth

Since 30" is greater than 25", multiply its length by 2 to equal 74" (adjusted length).

Fabric Repeat

5" + 9" equals 14", thus you will multiply your adjusted length of 74" by 1.1 for a total of 81.4". Divide 81.4" by 36" for a total of 2.26 yards.

Multiply 2.26 yards by 3 cushions, equaling 6.78 yards.

Now multiply your adjusted length of 37" by 1.1 for a total of 40.7". Divide 40.7" by 36" for a total of 1.13 yards. Multiply 1.13 yards by 3 cushions, equals 3.39 yards. 6.78 + 3.39 = 10.17 yards. Round this number to 11 yards.

Cording

Provide 1 yard.

Total Amount of Fabric

Send a total of 12 yards.

Chaise, Double Chaise and Steamer

PRICING

Use the cushion pricing charts, and add the following upcharges below for Chaise, Double Chaise and Steamer cushions. Please note the size ranges.

For pricing purposes, use the “total width” and then add an amount to account for the time and labor for the individual cuts.

CUSHION SET-UP CHARGE

- For a pinched method, add \$8.00 per pinch. For a single break chaise, add \$8.00 to the cost, a double break \$16.00, and a triple break \$24.00.
- For an unjoined seat and back cushion, add \$12.00 per break.
- For a joining piece to connect the seat and back section, add \$16.00 per break.

Example 1 – Chaise Cushion

Using the pricing grid below, overall width will be used.

For example, if a customer wants a chaise cushion that is 45” seat and 30” back, the total width is 75” and is priced in the 72”-78” wide cushion range. Next add the following:

- For a pinched method, add \$8.00 per pinch. For a single break chaise add \$8.00 to the cost, a double break \$16.00, and a triple break \$24.00.
- For an unjoined seat and back chaise cushion, add \$12.00 per break.
- For a joining piece to connect the seat and back section of the chaise, add \$16.00 per break. For a single break chaise, add \$16.00 to the cost, a double break \$32.00, and a triple break \$48.00.

For example, a 25” depth x 75” length x 3” boxed chaise cost is \$200.69. With one break, add \$8.00 for a total retail labor cost of \$208.69. With the designer discount, cost is \$104.35. If you priced these as single cushions, the designer’s cost would be \$123.00.

Depth			26”-28 ½”

98	to	108	\$226.89	\$234.60	\$248.52	\$258.80	\$280.43
108	to	120	\$243.34	\$251.51	\$267.23	\$278.13	\$302.03

Example 2 – Seat and Back (As a Set) Combinations

Using the pricing grid below, overall width will be used.

For example, if a customer wants a seat and back cushion that is 20” seat depth and 20” back height, the total width is 40” and would be priced like a 40” wide cushion. Then add:

- For a pinched method, add \$8.00 per pinch.
- For an unjoined seat and back cushion, add \$12.00.
- For a joining piece to connect the seat and back, add \$16.00.

Apply this Set Method to the Following Styles:

- Chaise
- Seat & Back Sets

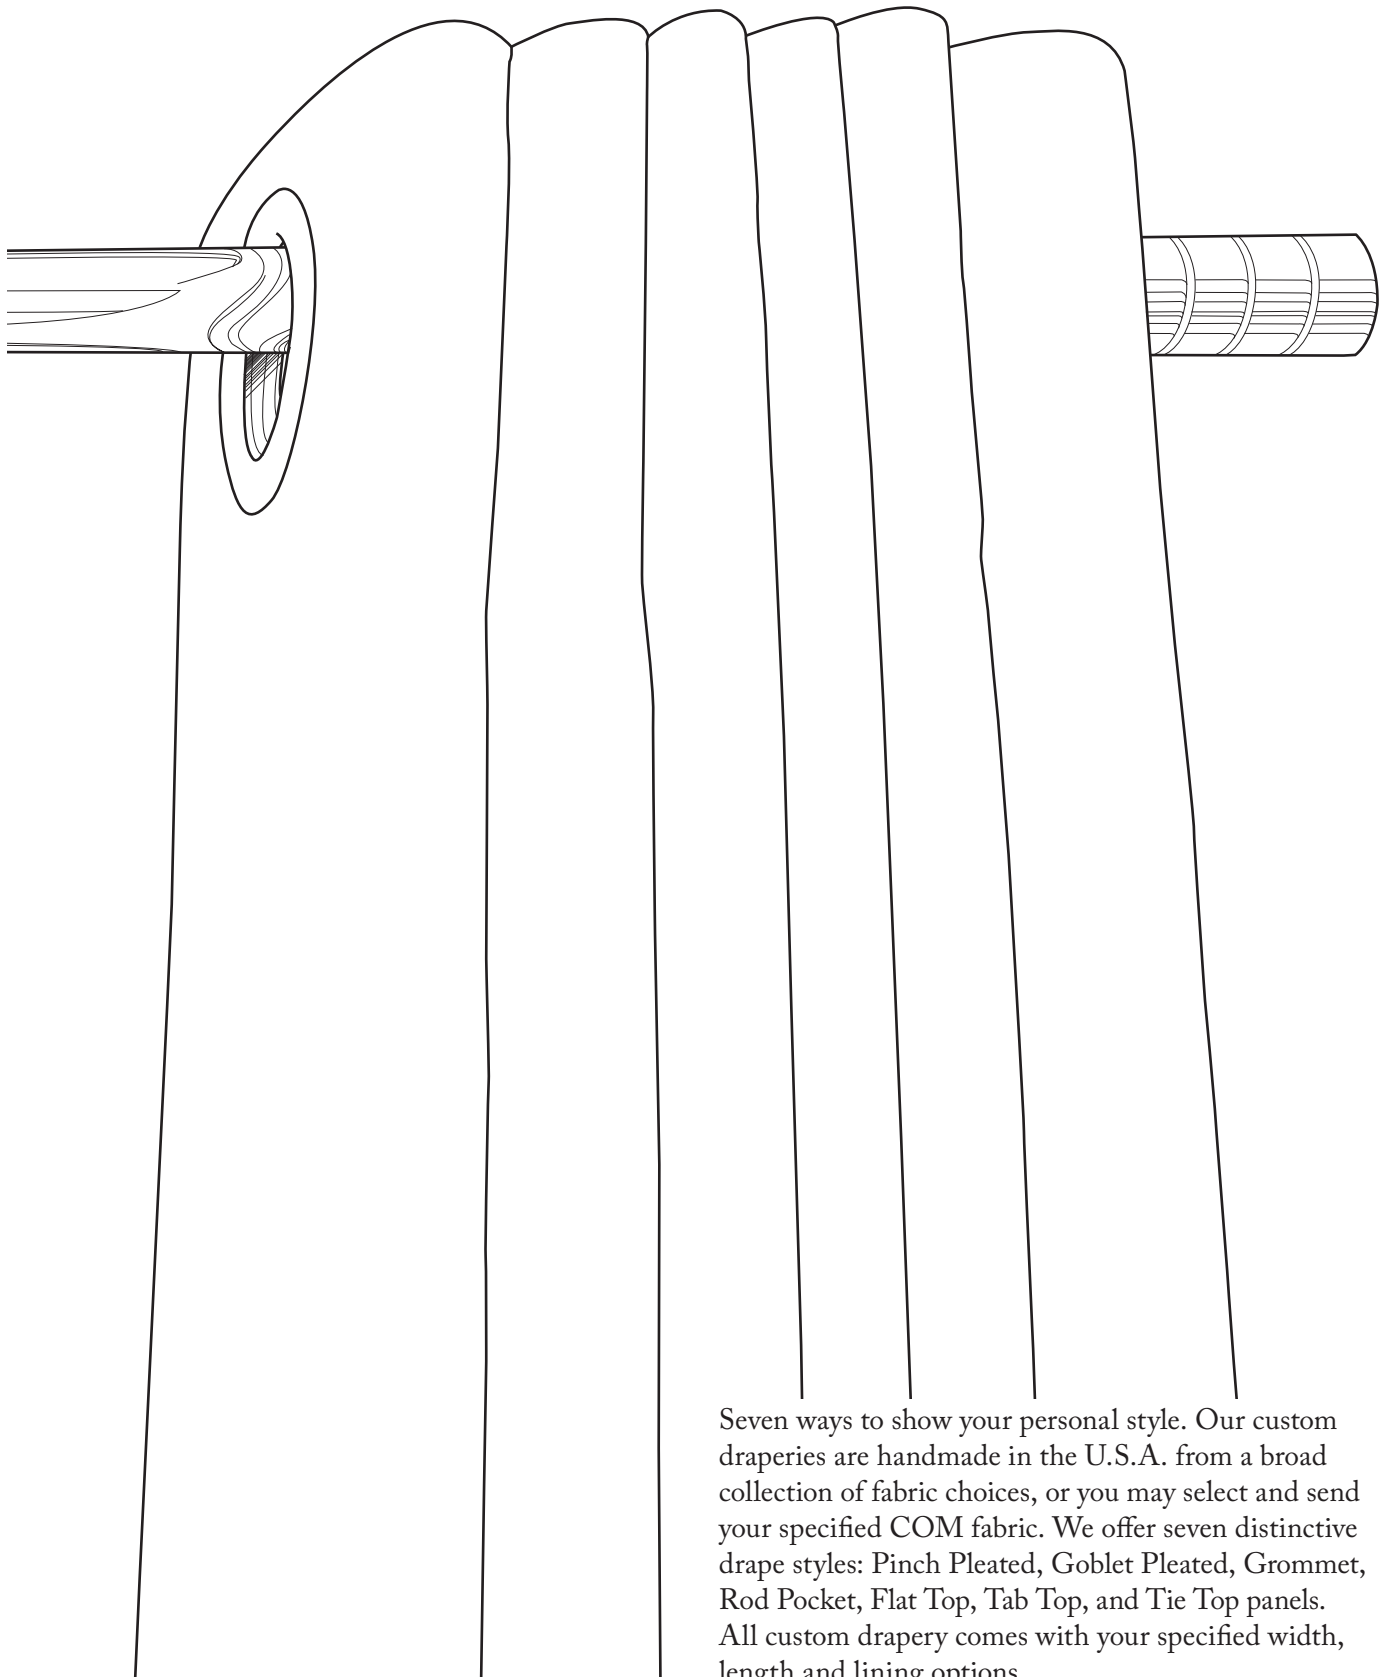

The Three Methods Used to Assemble Loveseat and Sofa Sets:

- Pinched Method (Primarily used for chaise, steamer and seat and back connected cushion.)
- Unjoined (Primarily used for loveseat and sofa sets.)
- Joining Piece (Primarily used for thick chaise and thick seat and back cushion sets.)

DRAPES

Seven ways to show your personal style. Our custom draperies are handmade in the U.S.A. from a broad collection of fabric choices, or you may select and send your specified COM fabric. We offer seven distinctive drape styles: Pinch Pleated, Goblet Pleated, Grommet, Rod Pocket, Flat Top, Tab Top, and Tie Top panels. All custom drapery comes with your specified width, length and lining options.

PINCH PLEAT DRAPES

PINCH PLEAT DRAPES

PINCH PLEAT DRAPES, both Euro and French, provide custom elegance and sophistication. Pinch pleat drapes are hand-pleated, pre-pinned and ready for installation.

- 4" double top with crinoline
- 3-finger French pleat, tacked at the bottom of the pleat
- 4" double bottom hem
- 2 ½" x fullness standard

Suggested Allowances for COM Fabric

LENGTH

Finished length + 8" (4" double bottom hem) + 8" (4" double top) + 2" (work) = cut length

WIDTH

Rod face x 2 ½ (fullness) + returns + 5" (side hems) ÷ width of fabric = # of cuts needed

ALLOWANCE FOR REPEAT

Option 1

- Panel cut length ÷ fabric repeat (in inches) = N (round to the nearest inch)
- N x fabric repeat = new panel cut length
- For example:
 - 108" (cut length) ÷ 26" (repeat) = 4.15" (round up to nearest inch)
 - 5" x 26" = 130" (new cut length) ÷ 36" = 3.6 yards (round up to the nearest half yard)

Option 2

- The first cut is at the cut length, and the other cuts are at the adjusted cut length to allow for the repeat. Just add one less repeat than the width of fabric.
- For example:
 - 3 widths of fabric, add 2 repeats
 - 4 widths of fabric, add 3 repeats
- For example:
 - 4 x 108" (cut length) = 432"
 - 432" + 78" (26" repeat x 3) = 510" ÷ 36" = 14.17 yards (round up to the nearest half yard)

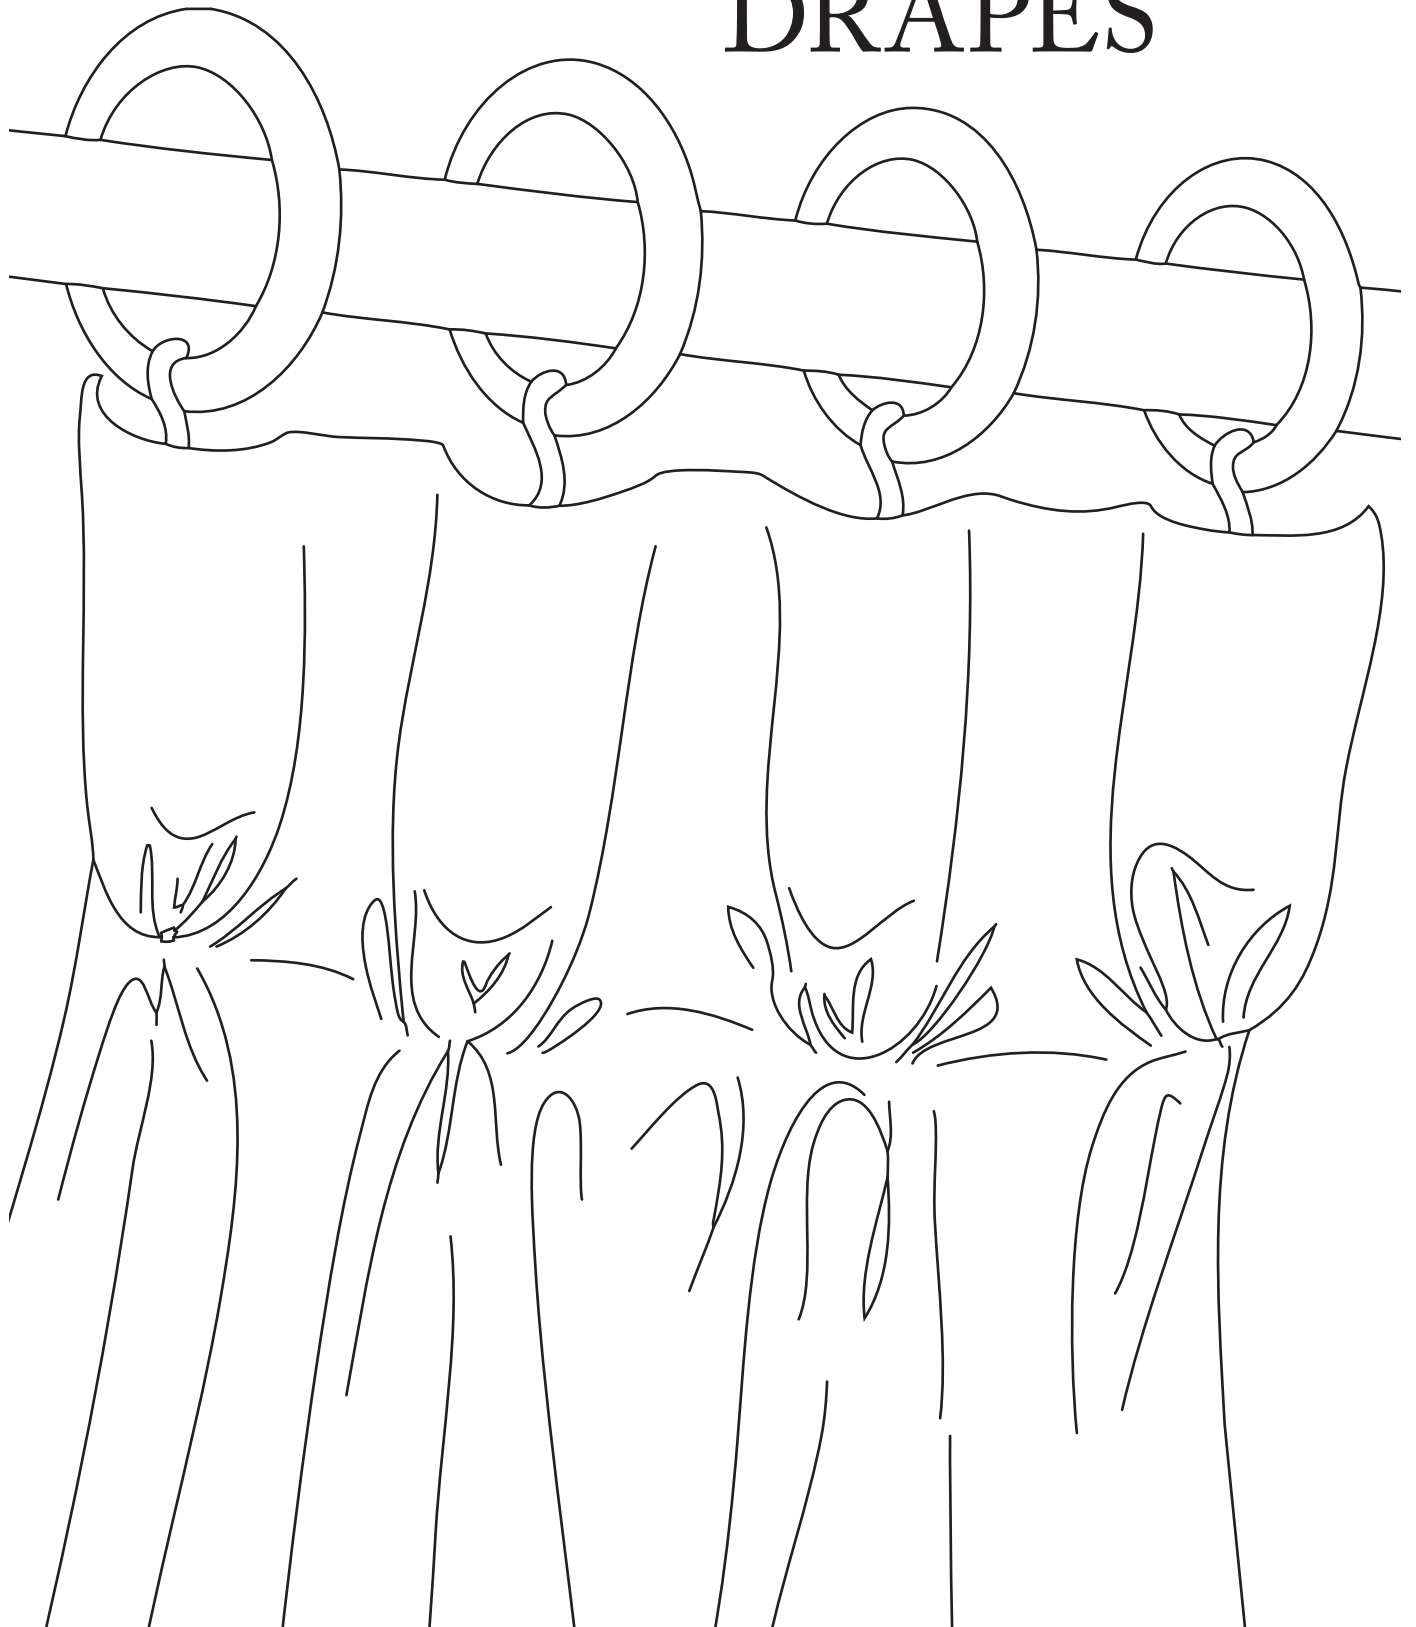

Standard 3 ½" returns and side hems are inclusive in the rod face measurement. Use the rod face (bracket to bracket) measurement to determine the number of widths needed. Always round up to nearest whole width.

Below is a quick reference to drapery widths required for application. Allowances provide proper fullness based on a 54" width fabric.

Widths	1	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6
Rod Face	29"	41"	53"	65"	77"	89"	101"	113"	125"	137"	150"

GOBLET PLEAT DRAPES

GOBLET PLEAT DRAPES

GOBLET PLEAT DRAPES offer sophistication in any setting of your home. The soft “goblet” formed at the top of the drapery pleats give this drape its descriptive name. Goblet pleat drapes are hand-pleated, pre-pinned and ready for installation.

- 4” double top with crinoline
- Single tops may be used, depending on the thickness of the fabric
- Seams are not pattern matched due to construction but are hidden behind pleats

Suggested Allowances for COM Fabric

LENGTH

Finished length + 8” (4” double bottom hem) + 8” (4” double top) + 2” (work) = cut length

WIDTH

Rod face x 3 (fullness) + returns + ease for fullness + 6” (side hems) ÷ width of fabric = # of cuts needed

ALLOWANCE FOR REPEAT

Option 1

- Panel cut length ÷ fabric repeat (in inches) = N (round to the nearest inch)
- N x fabric repeat = new panel cut length
- For example:
 - 108” (cut length) ÷ 26” (repeat) = 4.15” (round up to nearest inch)
 - 5” x 26” = 130” (new cut length) ÷ 36” = 3.6 yards (round up to the nearest half yard)

Option 2

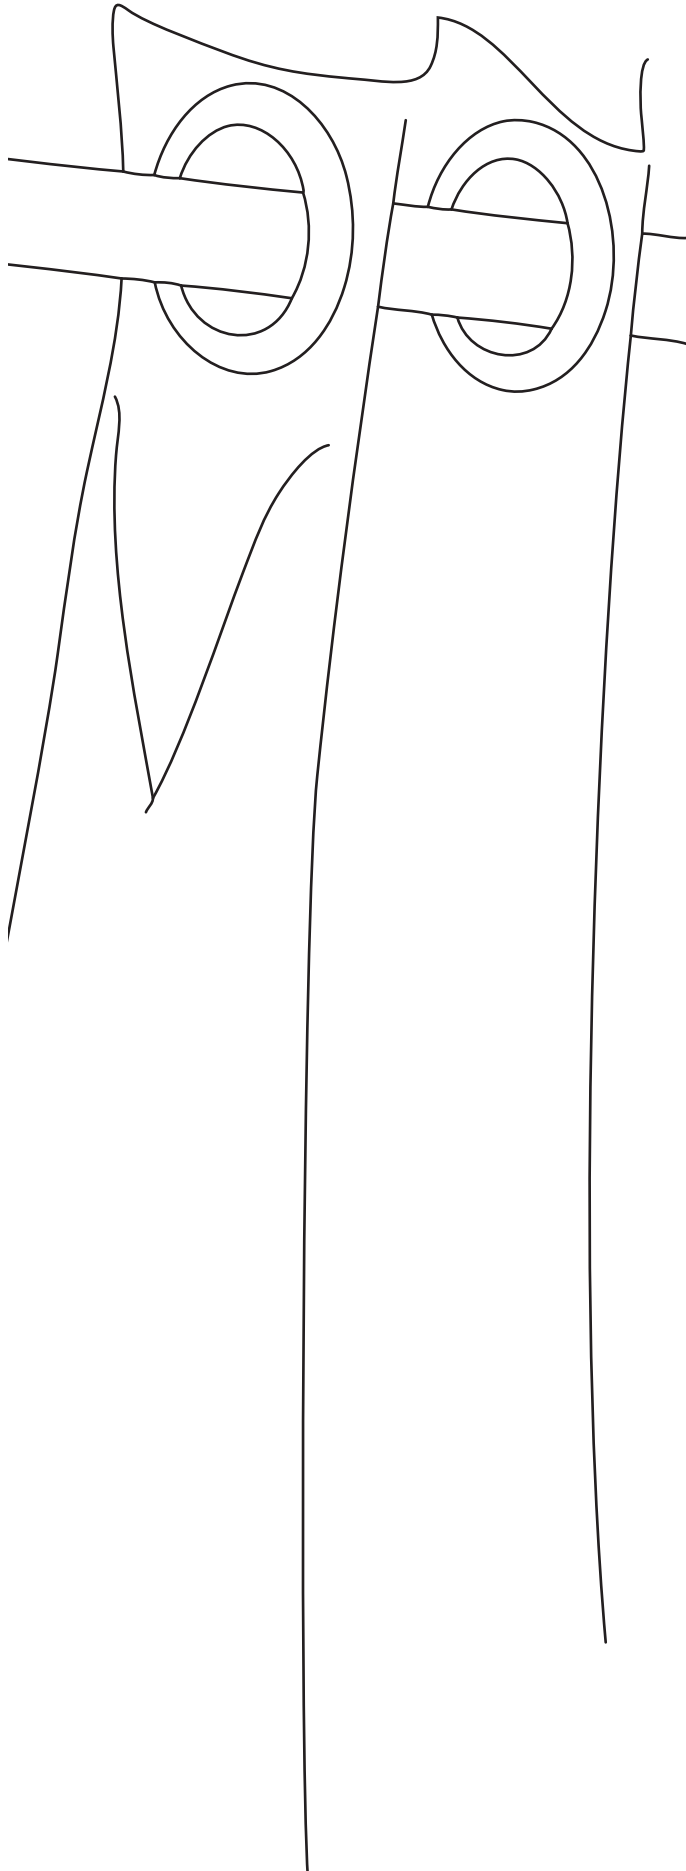

- The first cut is at the cut length, and the other cuts are at the adjusted cut length to allow for the repeat. Just add one less repeat than the width of fabric.
- For example:
 - 3 widths of fabric, add 2 repeats
 - 4 widths of fabric, add 3 repeats
- For example:
 - 4 x 108” (cut length) = 432”
 - 432” + 78” (26” repeat x 3) = 510” ÷ 36” = 14.17 yards (round to the nearest half yard)

Standard 3 ½” returns and side hems are inclusive in the rod face measurement. Use the rod face (bracket to bracket) measurement to determine the number of widths needed. Always round up to nearest whole width.

Below is a quick reference to drapery widths required for application. Allowances provide proper fullness based on a 54” width fabric.

Widths	1	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6
Rod Face	29”	41”	53”	65”	77”	89”	101”	113”	125”	137”	150”

GROMMET DRAPES

GROMMET DRAPES are a contemporary style that can be used in a formal or casual setting. We recommend this style for both indoor and outdoor applications.

Once a single width panel is installed on a rod, it can be adjusted between 24 inches and 33 inches. “Drapery Width” is the total area in width that you want your drape to cover (the width of the opening in which you are covering).

Suggested Allowances for COM Fabric

LENGTH

Finished length + 8” (4” double top) + 8” (4” double bottom hem) + 2” work = cut length

WIDTH

Rod face x 2 (fullness) + 2 returns + 6” (side hems) ÷ width of fabric = # of cuts needed

ALLOWANCE FOR REPEAT

Option 1

- Panel cut length ÷ fabric repeat (in inches) = N (round to the nearest inch)
- N x fabric repeat = new panel cut length
- For example:
 - 108” (cut length) ÷ 26” (repeat) = 4.15” (round up to nearest inch)
 - 5” x 26” = 130” (new cut length) ÷ 36” = 3.6 yards (round up to the nearest half yard)

GROMMET DRAPES

Option 2

- The first cut is at the cut length, and the other cuts are at the adjusted cut length to allow for the repeat. Just add one less repeat than the width of fabric.
- For example:
 - 3 widths of fabric, add 2 repeats
 - 4 widths of fabric, add 3 repeats
- For example:
 - $4 \times 108''$ (cut length) = 432''
 - $432'' + 78''$ (26'' repeat \times 3) = 510'' \div 36'' = 14.17 yards (round up to the nearest half yard)

Use the rod face (bracket to bracket) measurement to determine the number of widths needed. Always round up to nearest whole width.

GROMMET FINISHES

- Antique Brass
- Brass
- Antique Copper
- Matte Nickel
- Nickel
- Black

GROMMET SIZES

- 1 $\frac{7}{16}$ ''
- 1 $\frac{9}{16}$ ''
- 2''
- 2 $\frac{1}{2}$ ''
- 3''
- 1 $\frac{9}{16}$ '' Square (Antique Brass, Nickel and Black)

Returns are measured from drapery edge to center of first grommet.

Standard returns will be 3"-4" to center of first grommet. Return measure is relevant to grommet size.

An even number of grommets must be used.

8 grommets per 54" width of fabric is standard.

Spacing is approximately 6"-6 $\frac{1}{2}$ " between grommets, center to center of grommet (based on 8 grommets per width).

It is best if space size and number of grommets used be determined using workroom discretion based on size of drapery.

We cannot "hide" seams on grommet tops. Seams will fall on either side of the grommet.

The workroom will do their best to place the seam where least visible whenever possible.

Specifications

4" double header for smaller grommets, and 6" double header for larger grommets. Unless otherwise specified, top of grommets are set 1" from top of header.

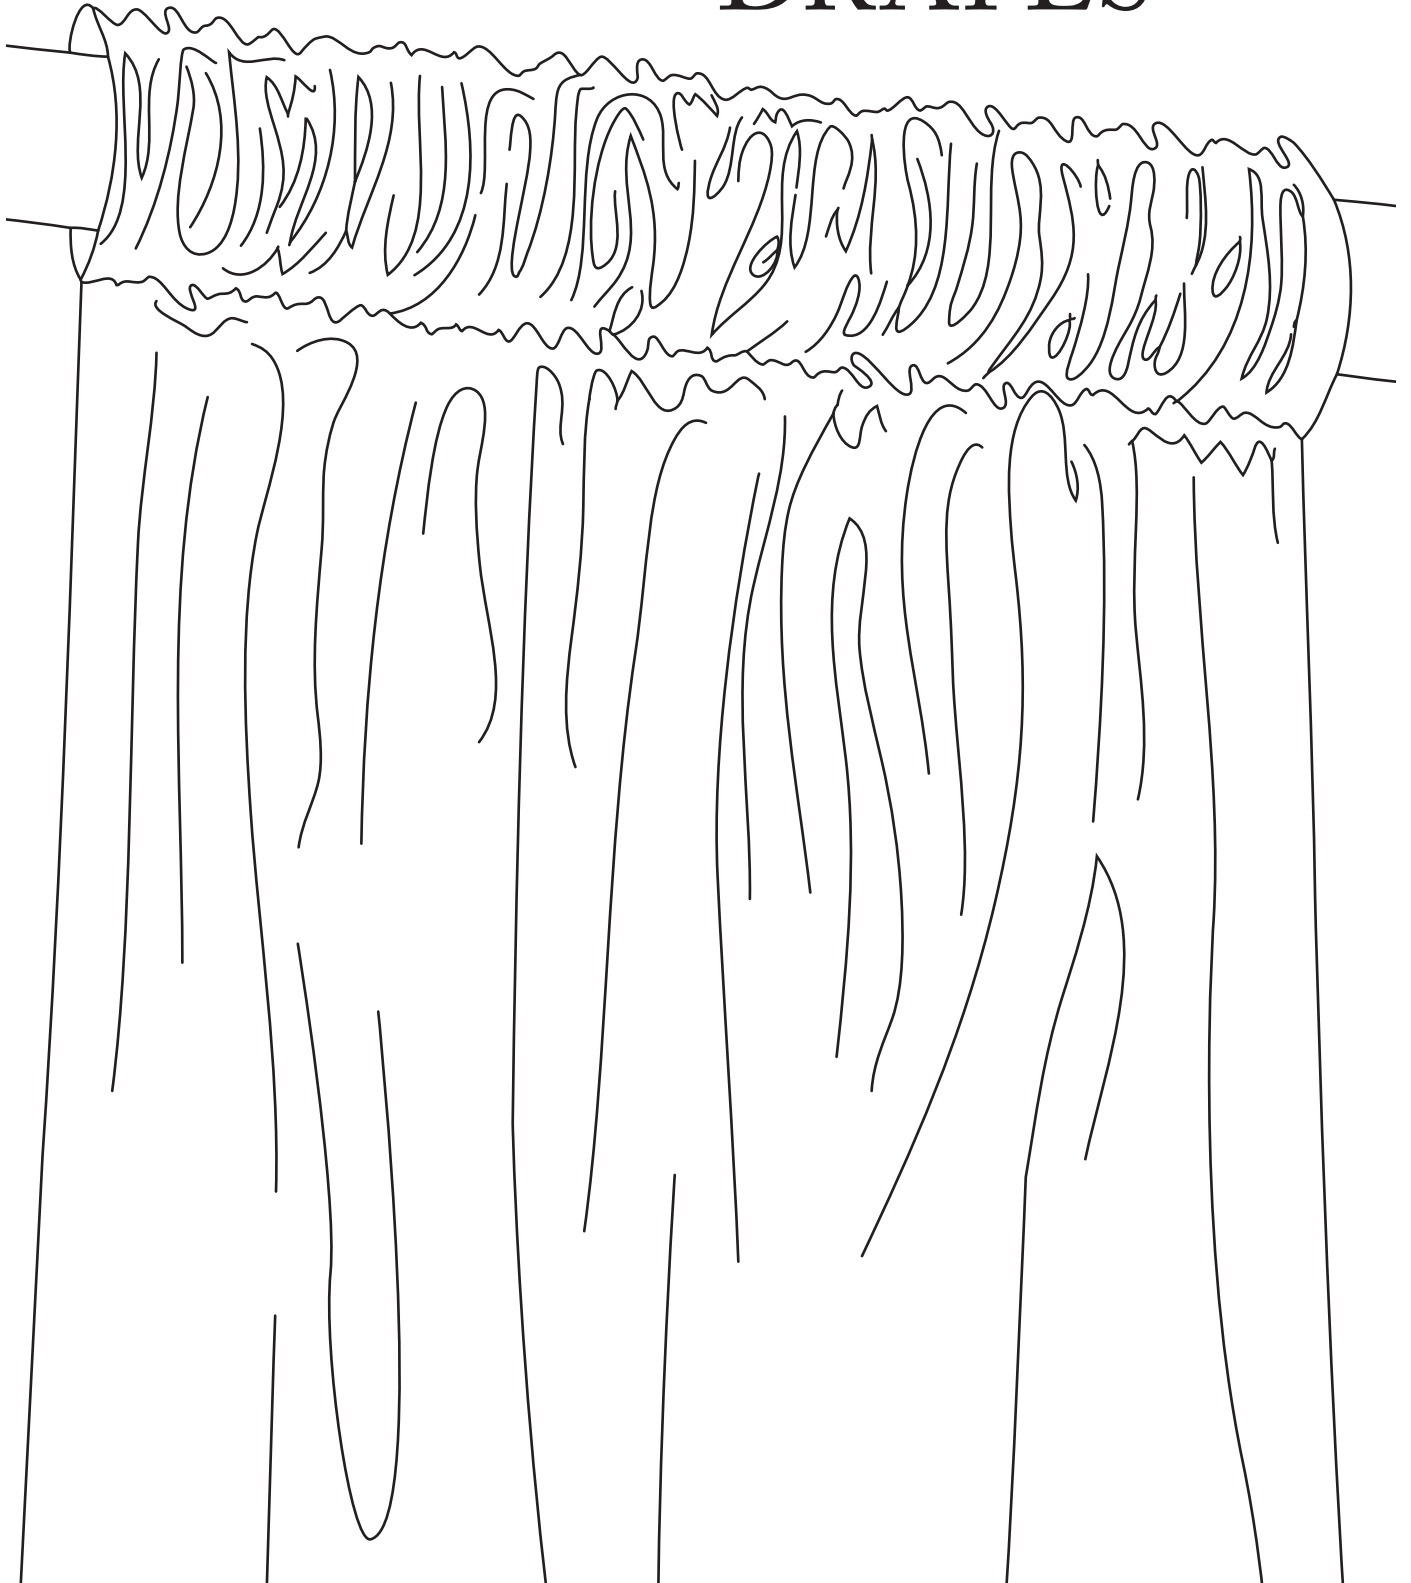

Note: Grommet and rod size selection effect rod face coverage.

Below is a quick reference to drapery widths required for application. Allowances provide proper fullness based on a 54" width fabric.

Widths	1	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6
Rod Face	48"	72"	96"	120"	144"	168"	192"	216"	240"	246"	288"

ROD POCKET DRAPES

ROD POCKET DRAPES

The simple and sophisticated **ROD POCKET DRAPE** adds beauty and style to any room. Finished with a rod pocket casing to accommodate your decorative rod, the rod pocket drape is timeless in its simplistic design.

- Standard fullness on regular rod pockets is 2 ½.
- Specify rod pocket size

We recommend this style for both indoor and outdoor applications.

Suggested Allowances for COM Fabric

LENGTH

Finished length + 8" (4" double bottom hem) + 8" (4" double top) + 2" (work) = cut length

WIDTH

Rod face x 2 ½ (fullness) + returns (ease for fullness) + 6" (side hems) ÷ width of fabric = # of cuts needed

ALLOWANCE FOR REPEAT

Option 1

- Panel cut length ÷ fabric repeat (in inches) = N (round to the nearest inch)
- N x fabric repeat = new panel cut length
- For example:
 - 108" (cut length) ÷ 26" (repeat) = 4.15" (round up to nearest inch)
 - 5" x 26" = 130" (new cut length) ÷ 36" = 3.6 yards (round up to the nearest half yard)

Option 2

- The first cut is at the cut length, and the other cuts are at the adjusted cut length to allow for the repeat. Just add one less repeat than the width of fabric.
- For example:
 - 3 widths of fabric, add 2 repeats
 - 4 widths of fabric, add 3 repeats
- For example:
 - 4 x 108" (cut length) = 432"
 - 432" + 78" (26" repeat x 3) = 510" ÷ 36" = 14.17 yards (round up to the nearest half yard)

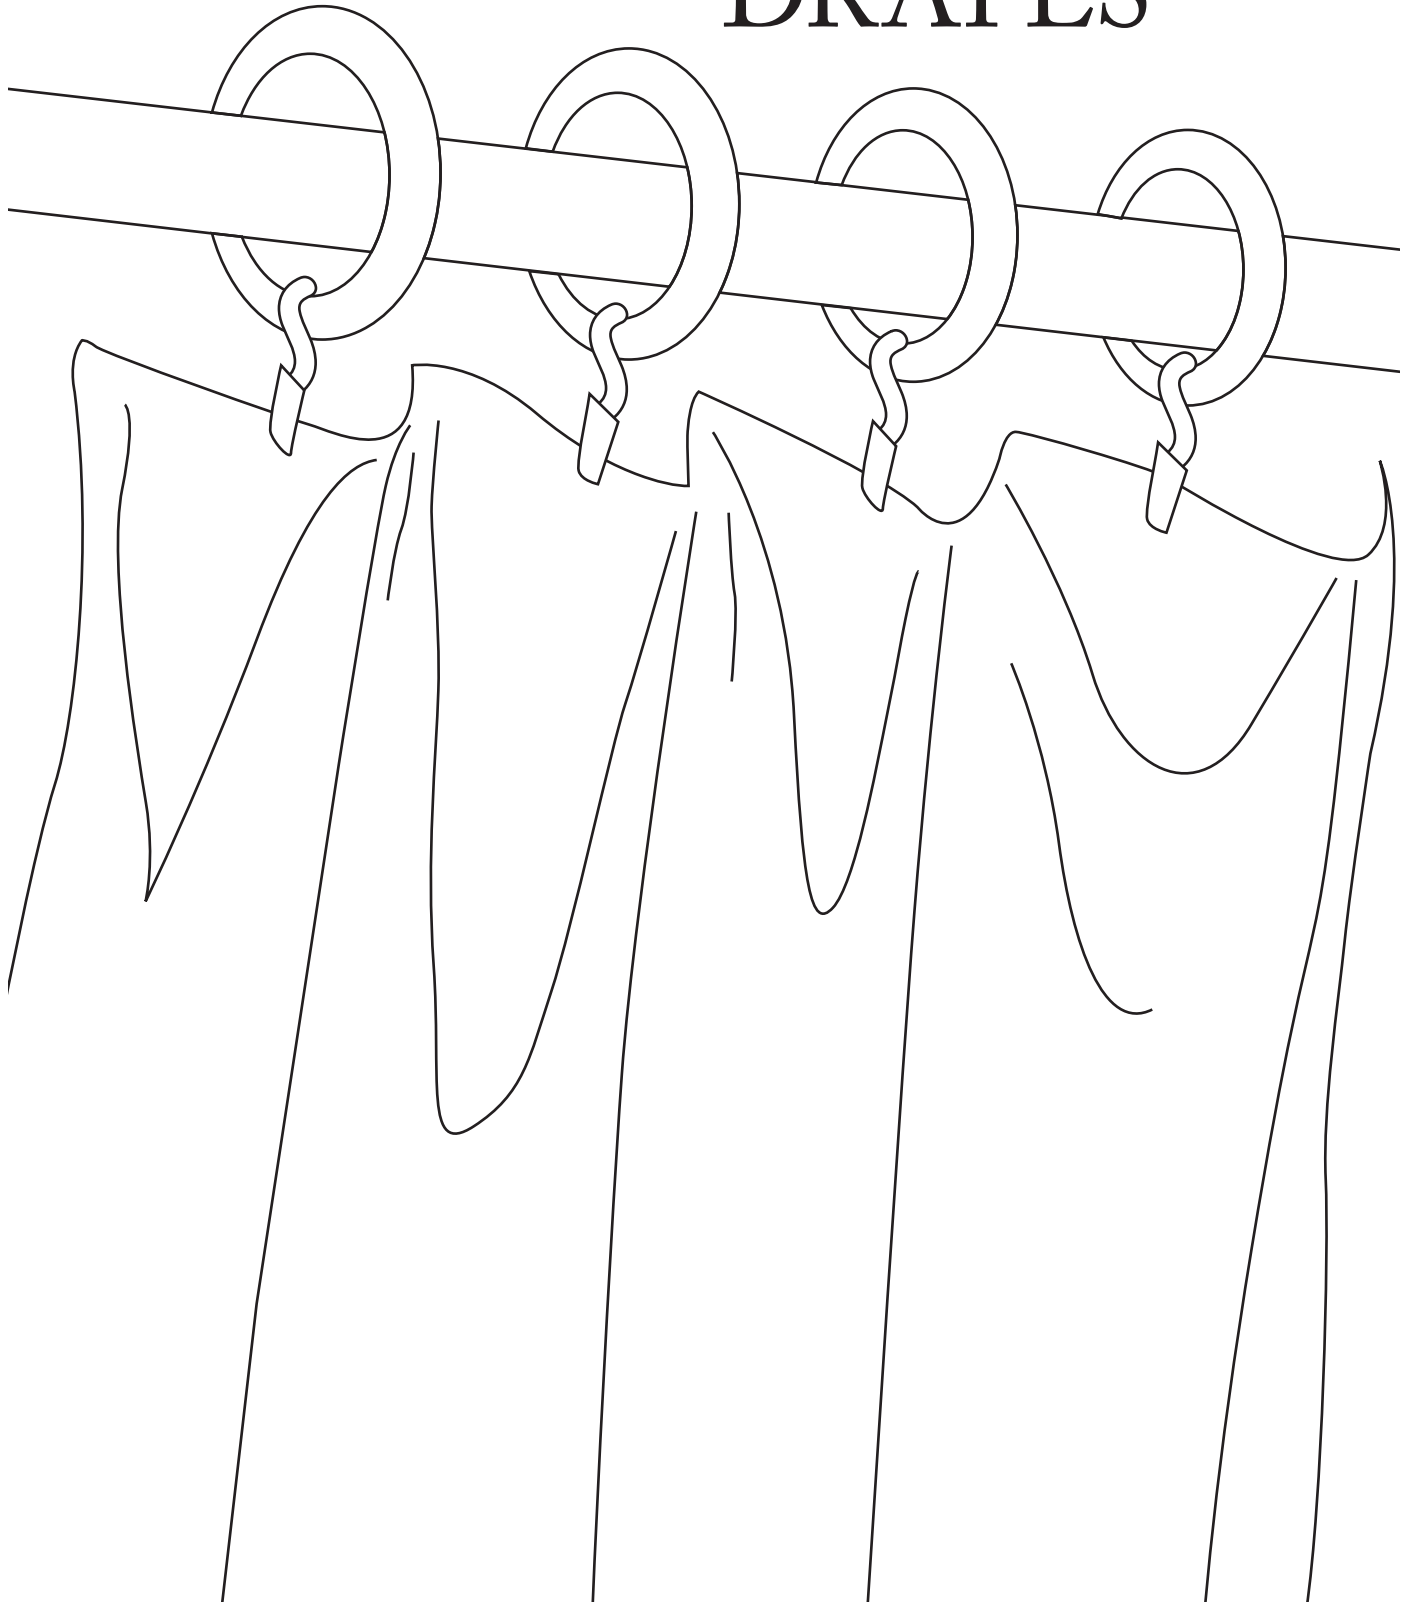

Use the rod face (bracket to bracket) measurement to determine the number of widths needed. Always round up to nearest whole width.

Below is a quick reference to drapery widths required for application. Allowances provide proper fullness based on a 54" width fabric.

Widths Rod Face	1 48"	1.5 72"	2 96"	2.5 120"	3 144"	3.5 168"	4 192"	4.5 216"	5 240"	5.5 246"	6 288"
--------------------	----------	------------	----------	-------------	-----------	-------------	-----------	-------------	-----------	-------------	-----------

FLAT TOP DRAPES

FLAT TOP DRAPES

FLAT TOP DRAPES are hung from rings as decorative or functional panels. These drapes provide a relaxed and casual look and will work on just about any rod or pole. With the flat top style, the top of the drape is hemmed with a light stiffening fabric that gives some body. The drape is attached to the rings of the rod with drapery pin hooks or can be attached to clip rings to allow the drape to softly cup between the rings. This drape comes standard with set drapery pins. Drapery pins are set approximately 12" apart.

Suggested Allowances for COM Fabric

LENGTH

Finished length + 10" (facing) + 1" (seaming) + 8" (4" double bottom hem) + 4" work = cut length

WIDTH

Rod face + 2 (fullness) + returns + 6" (side hems) ÷ width of fabric - # of cuts needed

ALLOWANCE FOR REPEAT

Option 1

- Panel cut length ÷ fabric repeat (in inches) = N (round to the nearest inch)
- N x fabric repeat = new panel cut length
- For example:
 - 108" (cut length) ÷ 26" (repeat) = 4.15" (round up to nearest inch)
 - 5" x 26" = 130" (new cut length) ÷ 36" = 3.6 yards (round up to the nearest half yard)

Option 2

- The first cut is at the cut length, and the other cuts are at the adjusted cut length to allow for the repeat. Just add one less repeat than the width of fabric.
- For example:
 - 3 widths of fabric, add 2 repeats
 - 4 widths of fabric, add 3 repeats
- For example:
 - 4 x 108" (cut length) = 432"
 - 432" + 78" (26" repeat x 3) = 510" ÷ 36" = 14.17 yards (round up to the nearest half yard)

Use the rod face (bracket to bracket) measurement to determine the number of widths needed. Always round up to nearest whole width.

Below is a quick reference to drapery widths required for application. Allowances provide proper fullness based on a 54" width fabric.

Widths	1	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6
Rod Face	48"	72"	96"	120"	144"	168"	192"	216"	240"	246"	288"

TAB TOP DRAPES

TAB TOP DRAPES

TAB TOP DRAPES are easy to install, and add simplicity to your life and your home. These classic drapes are made with no rings or hooks, which creates a free-hanging drape with fabric tabs at the top. We recommend this style for both indoor and outdoor applications.

Tabs are set approximately 12" apart.

Standard tabs are 2" wide x 4" long.

Suggested Allowances for COM Fabric

LENGTH

Finished length – the tab length + 2" work + 1" (seaming) + 8" (4" double bottom hem) = cut length

WIDTH

Rod face x 2 (fullness) + returns + 6" (side hems) ÷ width of fabric = # of cuts needed

ALLOWANCE FOR REPEAT

Option 1

- Panel cut length ÷ fabric repeat (in inches) = N (round to the nearest inch)
- N x fabric repeat = new panel cut length
- For example:
 - 108" (cut length) ÷ 26" (repeat) = 4.15" (round up to nearest inch)
 - 5" x 26" = 130" (new cut length) ÷ 36" = 3.6 yards (round up to the nearest half yard)

Option 2

- The first cut is at the cut length, and the other cuts are at the adjusted cut length to allow for the repeat. Just add one less repeat than the width of fabric.
- For example:
 - 3 widths of fabric, add 2 repeats
 - 4 widths of fabric, add 3 repeats
- For example:
 - 4 x 108" (cut length) = 432"
 - 432" + 78" (26" repeat x 3) = 510" ÷ 36" = 14.17 yards (round up to the nearest half yard)

Use the rod face (bracket to bracket) measurement to determine the number of widths needed. Always round up to nearest whole width.

Below is a quick reference to drapery widths required for application. Allowances provide proper fullness based on a 54" width fabric.

Widths	1	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6
Rod Face	48"	72"	96"	120"	144"	168"	192"	216"	240"	246"	288"

TIE TOP DRAPES

TIE TOP DRAPES

TIE TOP DRAPES are very simple to install, needing little to no instructions at all. Choose your own style by creating bows or knots with your ties. Our tie tab drapes are made of premium quality, durable reinforced professional stitching. Tie tabs are available in ½” or 1” wide (please specify when ordering) by 12” long for rods up to 2”. There are 7 ties on each 48” panel.

We recommend this style for both indoor and outdoor applications.

Suggested Allowances for COM Fabric

LENGTH

Finished length (not including ties) + 10” (facing) + 1” (seaming) + 8” (4” double bottom hem) + 2” work = cut length

WIDTH

Rod face x 2 (fullness) + returns + 6” (side hems) ÷ width of fabric = # of cuts needed

ALLOWANCE FOR REPEAT

Option 1

- Panel cut length ÷ fabric repeat (in inches) = N (round to the nearest inch)
- N x fabric repeat = new panel cut length
- For example:
 - 108” (cut length) ÷ 26” (repeat) = 4.15” (round up to nearest inch)
 - 5” x 26” = 130” (new cut length) ÷ 36” = 3.6 yards (round up to the nearest half yard)

Option 2

- The first cut is at the cut length, and the other cuts are at the adjusted cut length to allow for the repeat. Just add one less repeat than the width of fabric.
- For example:
 - 3 widths of fabric, add 2 repeats
 - 4 widths of fabric, add 3 repeats
- For example:
 - 4 x 108” (cut length) = 432”
 - 432” + 78” (26” repeat x 3) = 510” ÷ 36” = 14.17 yards (round up to the nearest half yard)

Use the rod face (bracket to bracket) measurement to determine the number of widths needed. Always round up to nearest whole width.

Below is a quick reference to drapery widths required for application. Allowances provide proper fullness based on a 54” width fabric.

Widths	1	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6
Rod Face	48”	72”	96”	120”	144”	168”	192”	216”	240”	246”	288”

DRAPERY STANDARDS

Maximum finished dimensions: 150”L x 288”W (standard in all styles.) If your needs exceed these dimensions, please contact us for a quote.

Pinch pleat are made with a three-fold French pleat at top.

Headings are 4” doubled with a non-woven buckram. If fabric is too bulky, a 4” single top will be constructed.

Fabric is surged to the crinoline on single tops.

Rod pockets are made with double heading and pockets unless specified, or if fabric is too bulky, single tops will be constructed.

Standard overlaps and returns on pinched draperies are made at 3 ½”. Please specify if different size return is required. Note adjustments in “Order Notes”.

Comparable fullness will be used for spacing between pleats on all pleated draperies that will be hanging in the same room.

To get comparable fullness in draperies, the fullness is adjusted to allow ½” to 1” difference in spacing between pleats.

Heavy duty zinc pin-on drapery hooks will be inserted 1 ¾” down from the top on pleated draperies.

Covered lead weights are inserted into corners and at seams of sheer draperies at no charge upon workroom discretion.

ALLOWANCE FOR REPEAT

Option 1

- Panel cut length ÷ fabric repeat (in inches) = N (round to the nearest inch)
- N x fabric repeat = new panel cut length
- For example:
 - 108” (cut length) ÷ 26” (repeat) = 4.15” (round up to nearest inch)
 - 5” x 26” = 130” (new cut length) ÷ 36” = 3.6 yards (round up to the nearest half yard)

Option 2

- The first cut is at the cut length, and the other cuts are at the adjusted cut length to allow for the repeat. Just add one less repeat than the width of fabric.
- For example:
 - 3 widths of fabric, add 2 repeats
 - 4 widths of fabric, add 3 repeats
- For example:
 - 4 x 108” (cut length) = 432”
 - 432” + 78” (26” repeat x 3) = 510” ÷ 36” = 14.17 yards (round up to the nearest half yard)

Folding Methods For Shipping

Flat draperies, such as rod pockets, are flat folded.

Pleated draperies are fan folded and carefully packaged in custom-built boxes.

- Pleats are staggered and folds beneath the pleats are aligned, and the panels are snugly wrapped in this position. Crinoline must be “broken” at installation when the panels are dressed.
- At times on large pleated draperies (over 5 widths per panel or over 108” in length) it may be necessary to flat fold the draperies to eliminate the possibility of shipping by truck. Because this method may increase the chance of wrinkling during shipping, please indicate if you do not wish to have your pleated draperies flat folded.

Lined Draperies

Lined draperies are made with a 1 ½” double bottom hem on the lining. Lining will be railroaded when possible.

- The lining is placed under the side hems and blind stitched to the side hem.
- At the heading, lining is turned and folded with the face fabric.
- Face fabric is exposed 4” on the back side of the heading.

Interlined rod pocket draperies or valances should be made with the pocket size ½” larger than normal to allow for extra take up when gathered onto the rod. Please include rod pocket size on the work order as we will not add this allowance.

When **blackout lining** is used, black pigment may show through at the stitch lines in the heading or when tacking pleats.

Unlined Draperies

We will use a single top on unlined drapery orders if we believe it will not affect the appearance of the drapery.

Seaming & Hemming

Side hems are 1 ½” doubled and blind-stitched. Lock stitching may be used on open weaves.

Bottom hems are 4” doubled and blind-stitched.

Multiple widths are joined by surging, which cuts away selvage edges and overlocks the seam.

All seams are hidden behind pleats on pinch pleated draperies. Seams on grommet tops draperies cannot be hidden, but our workroom does their best to place the seam where it will be least visible after installation.

Pattern Matching

All drapery widths are pattern matched, starting at the bottom.

Vertically striped fabrics will be pleated with the stripe falling randomly within the drapery. When vertical stripes require “hand-pleating” to pleat on pattern, please call us for a quote.

Prints, Woven Fabrics, Embroidered Fabrics, Woven Horizontal Stripes, Checks Or Plaids

Our workroom will automatically pattern match from the top down on some prints, wovens, embroidered, all plaids, checks, or woven horizontal stripes. An extra charge per width will be added to your invoice when needed on all orders using these fabrics. We cannot be held responsible if prints, woven, embroidered fabrics, plaids, checks, or woven horizontal stripes do not match at seams. In these fabrics unevenness in warp tensions can cause wavy horizontal lines. This will make the job of matching pattern lines difficult, if not impossible. Specify if you **DO NOT** want to pattern match from the top down. Our workroom will match these fabrics to the best of their ability and DCS will not be responsible for any labor or fabric cost due to these types of fabric issues. If your fabric has horizontal stripes and you want it railroaded so the stripes will run vertically, this must be specified on the work order. Depending on the length of the product, horizontal seaming may be necessary if the cut length is longer than fabric width.

Silk Fabrics

All silk fabrics are inherently woven with flaws, such as slubs, snags, or runs, coming from the vendor and will be used “as is” by our workroom without prior notice. The exception is if there are holes in the fabric. DCS will not be responsible for labor or fabric costs to remake products made from silk fabrics.

Casement Fabrics

Loosely woven casements are extremely sensitive to atmosphere changes and may shrink or stretch in varying weather conditions. DCS will not be responsible for handling or environmental conditions. We suggest draperies made from this type of fabrics be unlined and the finished lengths at least 1” off the floor.

Tolerance

DCS will not be responsible for stretching or shrinkage after the product has left our workroom. Our products are custom-made to your specifications and are measured before shipping. On any treatment made, we will allow up to a 1/2” tolerance in the width or the length of the product. All fabrics are inspected for flaws before cutting. Fabrics with minor defects or characteristic flaws may be used at the workroom’s discretion.

Drape Lengths

FLOOR LENGTH

The drapes are positioned 1/2” off the floor for a more traditional, tailored look. This length is best for traversing drapes. To measure for Floor Length drapes, measure from the bottom of your pole to 1/2” above the floor.

TROUSER LENGTH

The drapes are positioned at floor level. This length is best for stationary drapes. Stationary panels are not recommended to be moved. To measure for Trouser Length drapes, measure from the bottom of your pole to floor level.

PUDDLE LENGTH

The drapes have approximately 6-10” in length added beyond the floor. This length will set off a more dramatic look and is best for stationary panels. Stationary panels are not recommended to be moved. To measure for Puddle Length drapes, measure from the bottom of your pole to the floor. Add 6”-10” to your length, depending on how much you want your drapes to puddle.

Please specify your desired drape length style upon ordering.

THROW PILLOW STANDARDS

Standard Pillow Allowances

ROUND OR SQUARE PILLOW

- Pillow body width + 1 1/2" = cut width ÷ the fabric width = # of cuts needed
- Pillow body length + 1 1/2" = cut length = # of cuts needed (x cut length ÷ 36" = yardage estimate)
- Round up to the nearest 1/2 yard.

FLANGE PILLOWS

- Pillow body width + 2" or 2 1/2" flange + 1 1/2" = cut width ÷ the fabric width = # of cuts needed
- Pillow body length + 2" or 2 1/2" flange + 1 1/2" = cut length = # of cuts needed (x cut length ÷ 36" = yardage estimate)
- Round up to the nearest 1/2 yard.

Options Offered

C.O.M. AVAILABILITY

- Pillow fabrics
- Cording fabrics
- Button fabrics
- Button (specialty, i.e. vintage)
- Fringe

INVISIBLE ZIPPER (Standard as offered.)

- White
- Cream
- Black

EDGE OPTIONS

- Knife Edge
 - **Trim Allowances:** Add together all four sides of pillow + 10" easement ÷ 36" for total yardage.
- Flange
- Fabric Cording: Standard size is 1/4", while 1/2" and 1" are also available.
 - **Cording Allowances:** Bias Cut Yardage: Cording fabric is cut on the bias (diagonal) when it is used to cover cording. The bias has a slight natural stretch that allows fabric to ease around bends and curves without puckering. The longest center cuts are used first to avoid seaming.

The Bias Yardage Chart below provides you with the total inches of bias cut yardage yielded from ONE YARD of fabric. The minimum yardage we can use to make suitable bias cuts is 1/2 yard. First find total inches of cording required and size of cording required.

Finished Size of Cord	Bias Cut Width Size
1/4"	2" cuts
1/2"	3 1/2" cuts
1"	5" cuts

BIAS CUT YARDAGE CHART - 54" wide fabric	
Bias Cut Width	Total inches yielded in 1 yard
2" cut size	570 total inches
3 1/3" cut size	490 total inches
4" cut size	375 total inches
5" cut size	277 total inches
6" cut size	258 total inches
9" cut size	154 total inches

PRICING & YARDAGE

How to Calculate Retail Labor Price

Length + Width / 2 x Retail Labor Rate

Please refer to the right-side charts for the below examples.

FOAM EXAMPLE

- Diameter x 3.14 + length ÷ 2 x \$2.81 = Retail Labor Rate
- Example – 6” x 24” bolster with foam:
6” diameter x 3.14 = 18.84 + 24 length ÷ 2 x \$2.81 = \$60.19

POLY BUN EXAMPLE

- Example – 6” x 24” bolster with poly bun:
6” diameter x 3.14 = 18.84 + 24” length ÷ 2 x \$3.61 = \$77.33

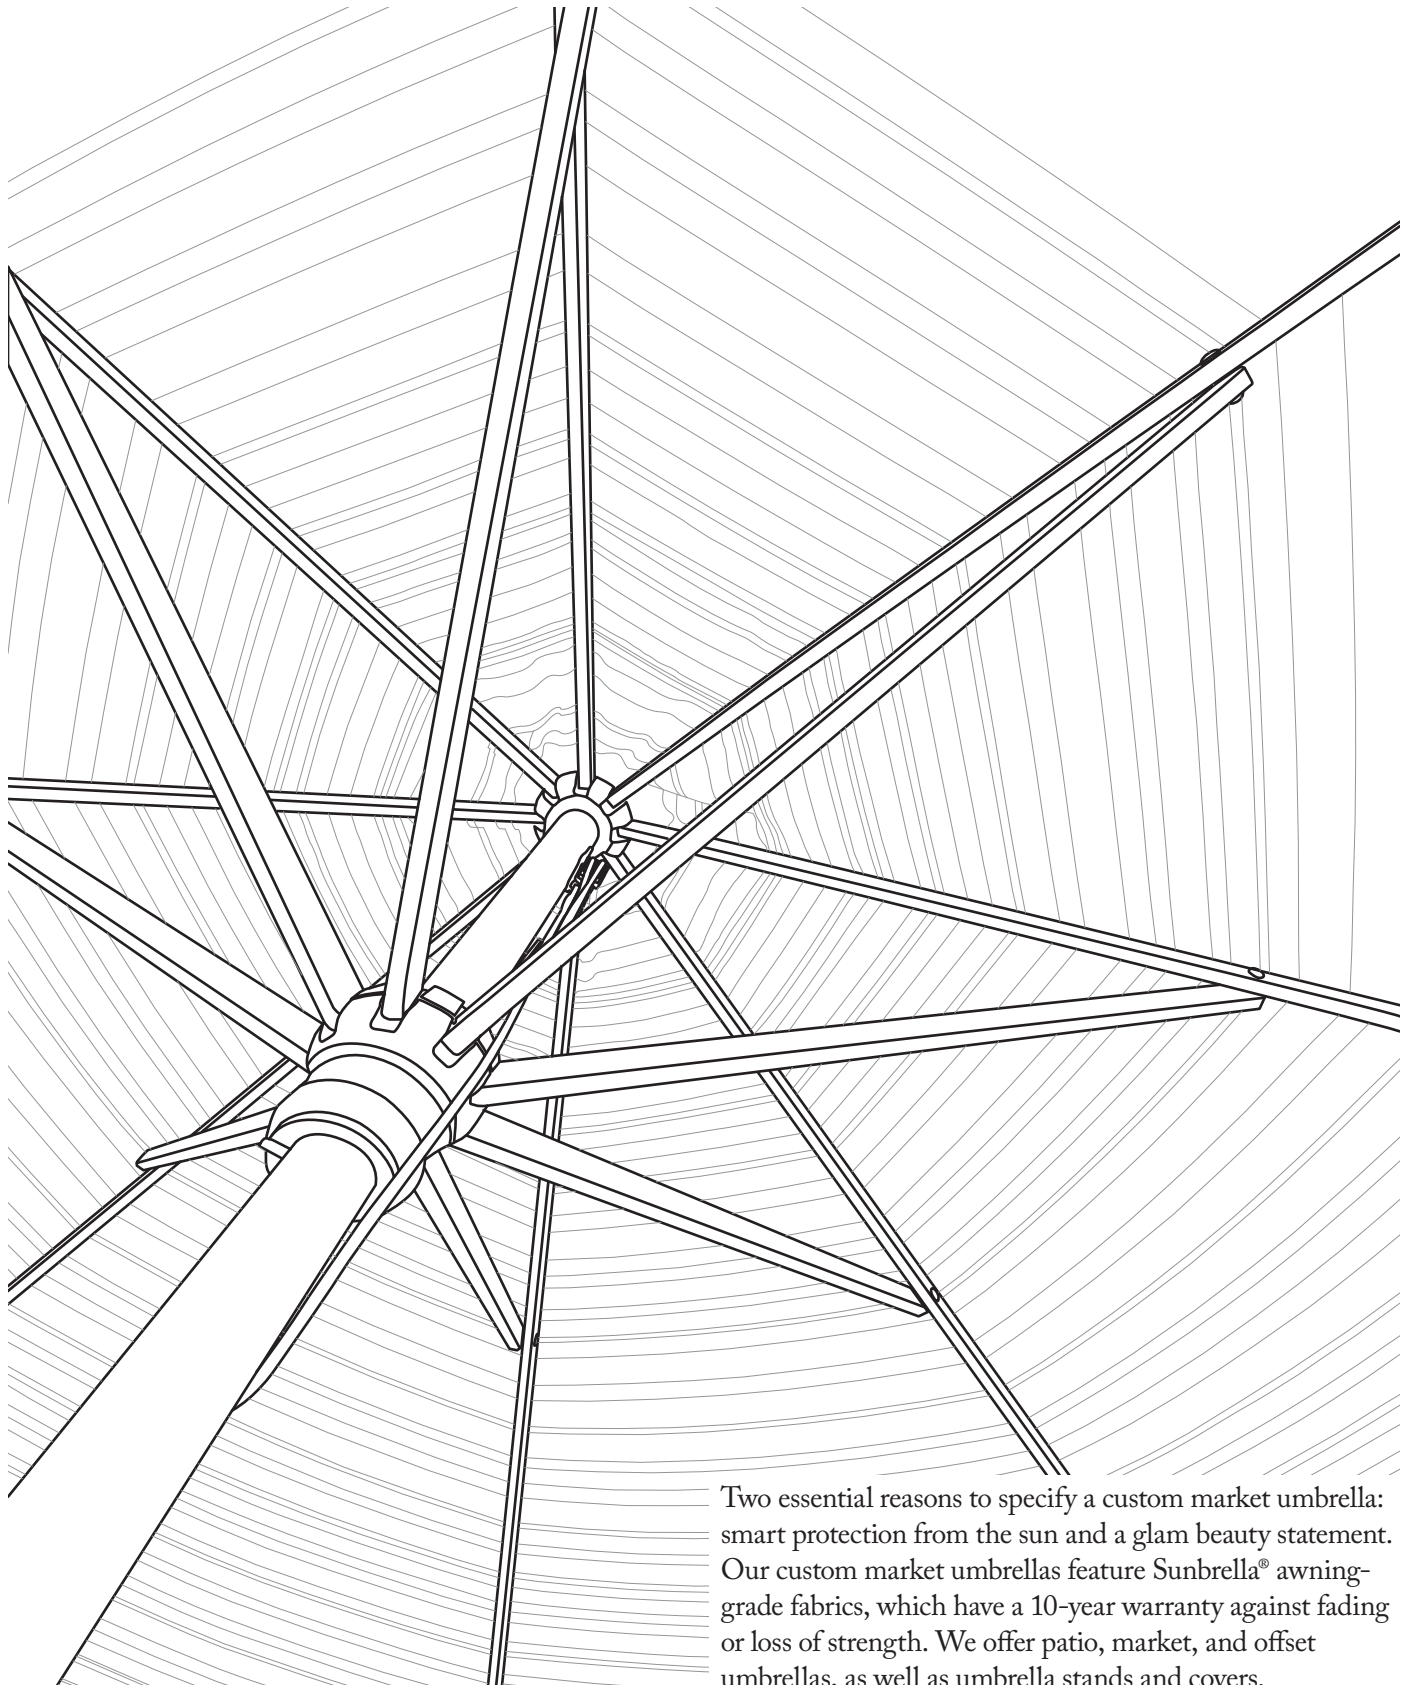

Fabric Yardage Requirements

- Up to 24”: Send 1 yard
- 25” and over:
 - 1 ½ yards solid fabric
 - 2 yards print fabric

UMBRELLAS

Two essential reasons to specify a custom market umbrella: smart protection from the sun and a glam beauty statement. Our custom market umbrellas feature Sunbrella® awning-grade fabrics, which have a 10-year warranty against fading or loss of strength. We offer patio, market, and offset umbrellas, as well as umbrella stands and covers.

Quick Features

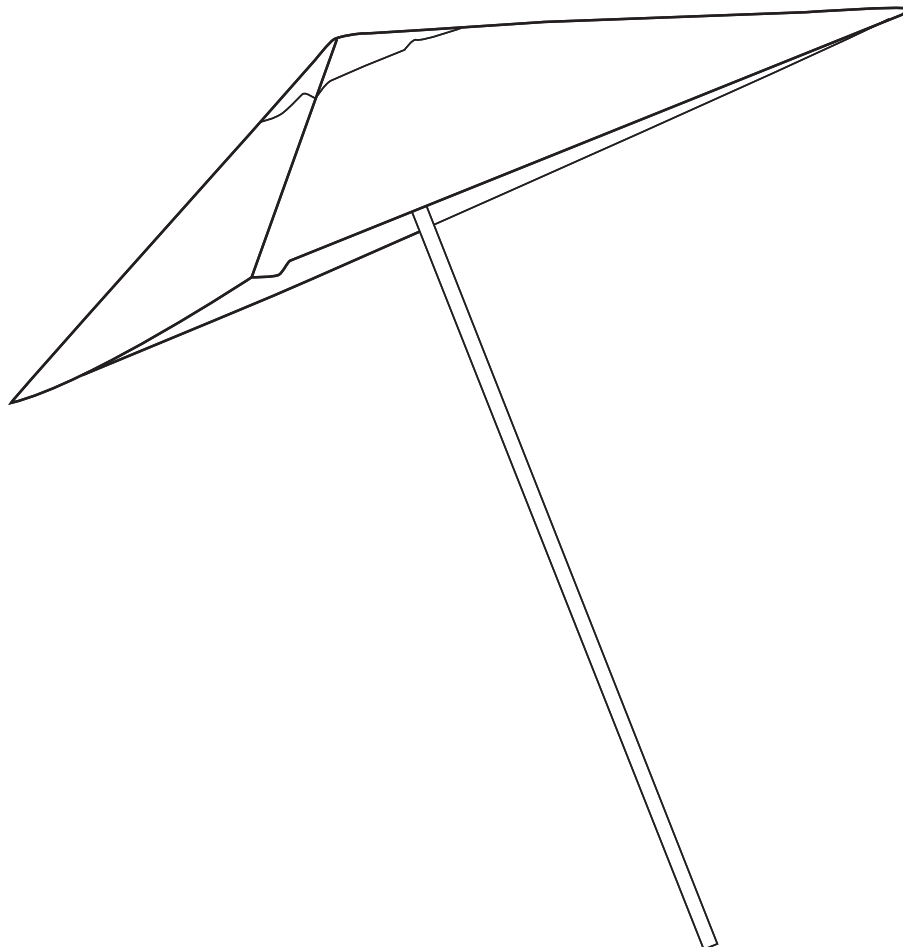

- 6.5' Canopy Span
- 4 Panel Square
- Double Pulley Opening System
- Aluminum Pole
- Fiberglass Ribs
- 1 ½" Pole Diameter
- 2mm Pole Thickness
- No Tilt
- Sunbrella® or Outdura® Canopy
- Logo Option

6.5' SQUARE ALUMINUM MARKET UMBRELLA

This **6.5' SQUARE ALUMINUM MARKET UMBRELLA** is a quality umbrella with a canopy made using your choice of Sunbrella® fabric or Outdura® fabric — covered by a 5-10 year warranty*. This fabric is known for its durability against the elements and its high resistance to staining and fading. While customizing this umbrella, the Alternating Fabric Option will allow you to choose a different fabric for the alternating panels.

Do you need a logo printed on your umbrella? You have the capability of adding a logo to this umbrella on 1 to 4 panels.

Quick Features

- 7.5' Canopy span
- 8 Panel octagon
- Hardwood pole
- Fiberglass ribs
- 1 ½" Pole diameter
- 1.85mm Pole thickness
- No tilt
- Pointed bottom pole
- Sunbrella® or Outdura® canopy
- Logo Option

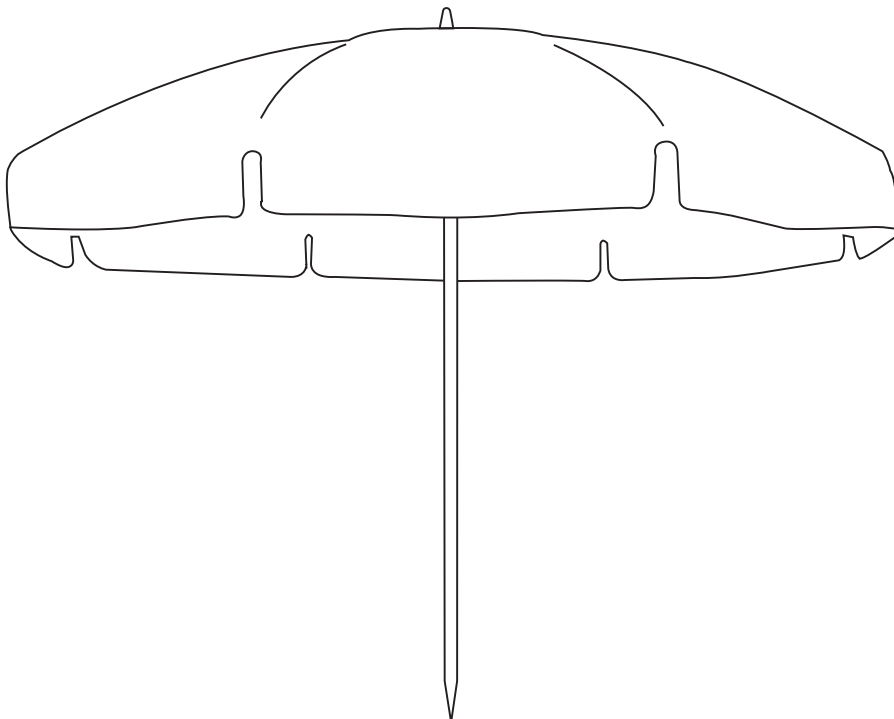

7.5' POP-UP WOOD BEACH UMBRELLA

WITH FIBERGLASS RIBS

This **7.5' POP-UP WOOD BEACH UMBRELLA** has white fiberglass ribs and a disassemble button. This beach umbrella features the push button pop-up opening system, which functions like a handheld umbrella. If you would not like the pop-up with button, please choose the option before checkout. This umbrella comes with a spiked pole to easily set in the sand.

The canopy of this wood beach umbrella is made using your choice of Sunbrella® fabric or Outdura® fabric — covered by a 5-10 year warranty*. This fabric is known for its durability against the elements and its high resistance to staining and fading. While customizing this umbrella, the Alternating Fabric Option will allow you to choose a different fabric for the alternating panels.

Do you need a logo printed on your umbrella? You have the capability of adding a logo to this umbrella on 1 to 8 panels. Valance printing is also an option at no additional cost for the panels with a logo added.

POWDER COATED STEEL SPIKE UMBRELLA STAND

Designer Custom Source presents our exclusive **STEEL SPIKE UMBRELLA STAND** in three sizes. Take your shade with you to the park, the pond or in your backyard. Hammer this Steel Spike Umbrella Stand into the ground, insert your umbrella pole into the umbrella stand neck and tighten the set screw to hold the umbrella securely in place. When you are ready to remove it from the ground, simply remove your umbrella and tap the side of the spike a couple of times to loosen the spike and wiggle the portable umbrella stand out of the ground.

UMBRELLA STANDARDS

Product and Delivery

There is a minimum 2-3 week production time from receipt of payment for all orders, without printing; minimum 3-4 weeks from receipt of payment and approved graphics for all orders with printing. Rush Charge of 30% applies to expedited orders requiring faster delivery. Freight quote will be determined based on quantity. Freight quote, if provided, is intended solely as an estimate of freight cost. However, as we do not control freight rates and charges from our chosen carriers, freight costs will be charged to you as incurred, regardless of quote provided.

Shipping

Our products ship via FedEx or UPS (depending on your zip code). Once shipped, you will receive a tracking number via the email address you provide. Ground shipments usually arrive within 2-5 business days. Please inspect the package when it arrives to review if damage occurred during shipping. If a box is crushed, wet or severely damaged, reject the shipment and do not sign for it. The item will be returned to us, which allows us to file a claim. We will then be able to ship your replacement item within 24 hours. If shipment is found to be damaged after delivery, contact customer service immediately so a claim can be filed. Please retain all damaged items and shipping materials, as the carrier may need to perform an inspection.

Warranty

Designer Custom Source offers a 1-year basic warranty on our products to the original purchaser from the date of purchase against defects in material and workmanship. During this period, Designer Custom Source will repair or replace, at our discretion, the defective component.

This warranty does not apply to items improperly installed, handled, abused, or damaged by user error, nor to any unit which has been repaired or altered by unauthorized repair companies. Designer Custom Source also does not cover product failure caused by unreasonable use and/or care, or acts of nature (i.e. wind/storm damage). Under no circumstances will the buyer be entitled to consequential or incidental damages. This limited 1-year basic warranty gives you specific legal rights; you may have other rights which vary from state to state where you live. Batteries and plastic housings are not covered by warranty.

Return Policy

To return a product based upon the replacement/return guarantee of Designer Custom Source, you must call or e-mail our Returns Department and obtain a Return Merchandise Authorization (“RMA”) number within the guarantee return period for the product (described above). Designer Custom Source will not accept returns without prior authorization and an RMA number. Once issued, RMA numbers are valid for 15 days in which must be returned to Designer Custom Source. RMA numbers will not be extended or reissued. Customer should prominently display the RMA number(s) on the shipping label of boxes containing the returned product.

Customer is solely responsible for shipping any returned product to Designer Custom Source. Customer agrees to use only reputable carriers capable of providing proof of delivery and insurance for the entire value of the shipment. Customer agrees to bear all shipping charges and all risk of loss for the return product during shipment. Customer agrees that all returned products will be 100% complete, in resaleable condition, and will include the original packaging material, manuals, blank warranty cards, and other accessories provided by the manufacturer. If any component of the returned product is missing, Designer Custom Source Return Procedure will be breached and Designer Custom Source will reject the entire return or may choose to impose additional charges against the customer for replacement of the missing component.

Designer Custom Source will not refund to Customer the original shipping charges. In addition, Designer Custom Source charges a 25% restocking fee on all non-defective returns for refund.

Products being returned for a refund must be received by Designer Custom Source prior to 30 days from the original invoice date. Returns received after the 30-day return period will no longer be eligible for refund.

Shipping charges are nonrefundable.

ITEMS WITH FREE SHIPPING

Returns on items that included ‘Free Shipping’ will be credited for the item ONLY minus the original shipping charges we incurred to ship the item(s) out to you and restocking fees will still apply. ‘Free Shipping’ will no longer apply once the item is returned. You will be responsible for the return shipping charges, as well as the shipping charges to send your replacement item.

NO RETURNS ON CUSTOM ORDERS.

CUSTOMER'S OWN MATERIAL (COM)

There is nothing more satisfying than a custom product. Enhance your satisfaction and service your client further by using your specified fabrics, buttons and trims.

SEND YOUR COM TO:

Designer Custom Source
Attn: COM Orders
3180 Wetumpka Hwy.
Montgomery, AL 36110

Important: Please ATTACH a copy of your invoice to the fabric when you send it. If you cannot send a copy of your invoice, please ATTACH the following to the fabric: your name, invoice number, ship to address, phone number, and e-mail address.

Designer Custom Source lets your imagination create designs with your favorite fabrics, trims and buttons.

CUSTOMER'S OWN MATERIAL PROCEDURES

Step 1

Select COMFAB at the Fabric Selection step.

Step 2

Determine the quantity of fabric you will need. Consider the repeat, cording, and stripe patterns when determining the yardage requirements. When you place an order, a fabric requirement estimate is shown on your invoice. Please only use this estimate as a guide for determining how much fabric to send. For striped COM fabric, please add an additional 15% fabric and indicate which direction the stripe should run (vertically or horizontally). If reversible, please specify which side to use. If you are using a different COM fabric for the cording (welting), clearly indicate which fabric is to be used for the cording. Please send only cut fabric.

Step 3

SEND YOUR FABRIC TO:

Designer Custom Source
Attn: COM Orders
3180 Wetumpka Hwy.
Montgomery, AL 36110

Important: Please ATTACH a copy of your invoice to the fabric when you send it. If you cannot send a copy of your invoice, please ATTACH the following to the fabric: your name, invoice number, ship to address, phone number and e-mail address.

CUSTOMER'S OWN MATERIAL

FAQ

Where do I find out how much fabric to send?

After you place an order, a fabric requirement estimate will be shown on your invoice. Please note, this is just an estimate; if your fabric has a large repeat, a stripe pattern, or a cording requirement, please plan on sending more fabric than the estimate — we recommend an additional 15%. If the COM quantity received is inadequate to complete the order, we will make the cushions with the fabric we have and contact you for more fabric to complete the order. Leftover fabric will be discarded.

How long will my order take?

Once we receive your fabric, your custom cushion order will take up to 20 business days for completion. Our goal is 10–15 business days or less. Once shipped, depending where you are, Ground Shipping can take up to 5 business days for delivery. Since we are shipping from the eastern U.S., a California cushion order will spend 5 business days in transit.

How should I ship my fabric?

Customers should send COM via a shipping service that provides a tracking number and proof of delivery. The customer will be responsible for fabric until it is in our possession as evidenced by a signed tracking document.

COM fabrics must be readily available in the marketplace at competitive prices in the event Designer Custom Source needs to replace the fabric due to loss or damage. We reserve the right to decline fabrics that we deem to be difficult or problematic. We do not sew texelene or sheers, for example. Designer Custom Source liability for lost, misplaced or damaged fabrics will not exceed \$50 per yard. Proof of purchase with pricing may be required.

FREQUENTLY ASKED QUESTIONS

How Soon Will My Order Be Shipped?

Since all of our products are made to order, your order will typically ship in 3-4 weeks, depending on the volume of orders we are receiving.

Is It Safe To Use My Credit Card For Online Purchases?

Yes, it's extremely safe. At Designer Custom Source, we provide a secured checkout with Secure Socket Layering (SSL up to 256 bits) for processing your payments online. Add items to your cart and click Secure Checkout to make your payment using a Visa, MasterCard, Discover or American Express. You can also pay using your PayPal account, a personal check or PO (purchase order). Payments using a personal check or purchase order are placed on hold until we receive your check or PO and credit information. Payments will be billed as "OCG LLC" — our parent company name.

How Do I Check The Status Of My Order?

Once you are a registered customer of Designer Custom Source, you can log in and check the status of your order. Or please call us at 800.510.8325.

Delivery Times

In addition to the manufacturing/processing times, add 3-5 business days for Standard UPS or FedEx ground shipping (depending on destination). We normally ship via FedEx or UPS Ground. All shipping costs and times are calculated using normal ground delivery. Most orders can be delivered within 5 business days from the shipping date. Normally, our shipments do not require a signature and are left on your doorstep if you are not available at the time of delivery. Larger orders and products may have to be shipped via LTL truck carrier. Expedited shipping is available and appropriate rates apply.

Do You Ship Out of the United States?

Yes, we have published some research into external services that provide US-based addresses. The providers are called Freight Forwarders because they will forward your US purchases from a central warehouse located in the US to your international location. These companies provide you with a US-based delivery address, which you can use as your shipping address for online purchases at Designer Custom Source or any other online store.

Why Do You Charge Tax Online?

All orders originating in the state of Alabama are subject to state and city tax as required by law due to our Company's corporate location in Montgomery, AL. The exact amount of sales tax applied to your online order will appear in the order review screen once you have entered your zip code.

What Credit Cards Do You Accept For Payment?

We accept MasterCard, Visa, Discover, and American Express.

How Do I Change My Shipping Address On A Current Order?

You can change your shipping address by contacting Customer Service. You will be responsible for any fees associated with redirecting your deliveries and/or lost merchandise. If your order has already been processed or shipped, we will not be able to make any changes.

What Is The Order Cancellation Policy?

Designer Custom Source accepts cancellations and order revisions up to one (1) business day from placing the order. There are some exceptions to this, depending on if the order is already in the production process (i.e. fabric cutting, etc.). All cushion and pillow products appearing on this website are made to order using customer specifications. Once a custom order is in production and the fabric has been cut to your specifications, the fabric is no longer suitable for use on any future orders, and the order cannot be canceled.

Customers will have ninety (90) days to submit their template(s) or COM (customer's own material) for orders with such requirements. If a customer does not respond to our contact attempts within these 90 days, Designer Custom Source has the right to cancel the order(s) and charge the customer a \$45 cancellation processing fee per order.

Customers will have ninety (90) days to resume or cancel their order(s) once they have placed their order(s) on HOLD. If a customer does not contact us or respond to our contact attempts within these 90 days, Designer Custom Source has the right to cancel the order(s) and charge the customer a \$45 cancellation processing fee per order.

Designer Custom Source reserves the right to accept or reject reworks at our own discretion.

FABRIC CARE

General Care & Cleaning Tips for Upholstery

After purchasing a piece of upholstered furniture, it is important to know proper cleaning methods to ensure your item maintains its new appearance for years to come. By following a few simple cleaning tips, you can obtain the maximum amount of use out of your couch, chair or ottoman.

CLEANING INSTRUCTIONS

- When cleaning your upholstery, use a cleaner that also deodorizes, is safe for your fabric and does not contain any harsh chemicals. Also, be sure to lightly brush or vacuum your furniture prior to cleaning. This will prevent dirt from entering the fabric while you clean.
- Apply cleanser to stains using a strong brush. When cleaning, do not rub or scrub the fabric too harshly.
- Use a damp sponge or cloth to remove the remaining cleanser after a minute or two.
- After cleansing, be sure your fabric dries thoroughly. To dry your furniture more quickly, leave a window open or run a fan nearby.
- Consider using a cover to protect your furniture if you have animals or small children. This will help you avoid stains.
- Once a week, remove dirt from the fabric by lightly brushing or vacuuming your upholstered piece. This will prevent dirt from entering the fabric and will assist in preserving its appearance.
- Turn or reverse the cushions on your furniture often so they wear evenly. This will also allow you to notice stains sooner. If you do observe a stain, remember to clean upholstered furniture with the weakest solution possible.

While cleaning upholstered fabrics may not always be simple, putting time into caring for your furniture will ultimately be a rewarding task. After all, upholstered fabrics that have been properly cared for can retain their appearance for several years.

Silk Fabric Care & Cleaning

While dry cleaning is recommended, there may be instances where you prefer to hand wash your silk item. In these cases, follow these guidelines to ensure your silk retains its appearance.

HAND WASHING

- Test for color fastness prior to washing. To do so, place a small portion of the silk in lukewarm or cold water. Afterwards, place white cotton fabric over the silk and press a warm iron. While a faint mark is okay, do not wash if there is any other transfer of color from the silk to the white fabric.
- Do not bleach or boil your silk items.
- Use cleansers designed for delicate lingerie to hand-wash light-colored silk in warm water.
- Use tepid water at least three times to rinse thoroughly.
- Remove surplus water by placing your silk item in a dry, clean towel. Do not leave your silk in wrinkled condition.
- Allow your silk item to dry in a space away from direct sunlight or heat. Once the material is evenly damp, press your silk with a cool iron. Be sure you do not apply too much pressure over seams.
- Do not use a steam iron or try to re-dampen your silk.
- Finish off lightly on the right side.
- Because dark colors are obtained by adding coloring matters, color fastness cannot be guaranteed. Therefore, it is important to be cautious with darker hues.

Sunbrella® Care & Cleaning Overview

All cleaning information provided by Sunbrella®.

One of the best ways to keep Sunbrella® fabrics looking good and to delay deep or vigorous cleaning is to properly maintain the fabrics. This can be accomplished by simply brushing off dirt before it becomes embedded in the fabrics, wiping up spills as soon as they occur or spot cleaning soon after stains occur.

GENERAL OR LIGHT CLEANING

- Brush off any loose dirt.
- Prepare a cleaning solution of 2 ounces (¼ cup) mild soap per gallon of lukewarm water (less than 100°F/38°C).
- Use a sponge or a soft bristle brush to clean.
- Allow cleaning solution to soak into fabric.
- Rinse thoroughly to remove all soap residue.
- Allow fabric to air dry.

SPOT CLEANING

- Apply a light mist of mild soap and water using a spray bottle.
- Work the solution into the stain by lightly scrubbing the area with a sponge or very soft bristle brush.
- Rinse thoroughly to remove all soap residue.
- Blot excess moisture with a clean, soft towel or sponge.
- Wet-vacuum or blot excess water.
- Air dry, repeat steps 3 and 4 until all soap residue is removed.

FOR REMOVABLE SUNBRELLA® FABRIC

Hand-washing

- Soak fabric in a solution of ¼ cup mild soap per gallon of lukewarm water.
- Use a sponge or a soft bristle brush as necessary.
- Rinse thoroughly to remove all soap residue.
- Air dry.

Machine-washing

- Do not machine wash fabric.

HEAVY CLEANING FOR STUBBORN STAINS AND MILDEW

Sunbrella® fabric does not promote mildew growth; however, mildew may grow on dirt and other foreign substances that are not removed from the fabric. To clean mildew or other stubborn stains:

- Prepare a solution of 8 ounces (1 cup) of bleach and 2 ounces (¼ cup) of mild soap per gallon of clean water.
- Spray on entire area and allow to soak into the fabric for 15 minutes.
- Remove stain with a sponge, clean towel or very soft bristle brush.
- Rinse thoroughly to remove all soap residue.
- Allow fabric to air dry.
- If stain and/or mildew are severe, bleach quantities may be increased. See our stain chart for removal of specific stains.

RE-TREATING THE FABRIC FOR EASE OF CLEANING

Sunbrella® fabrics have a special finish that enhances water repellency. The finish is designed to last for several years of normal use, but may be refreshed after a thorough cleaning or extended use.

Glen Raven, Sunbrella's parent company, recommends 303 High Tech Fabric Guard™ as the preferred re-treatment product for Sunbrella® fabrics.

APPLYING 303 HIGH TECH FABRIC GUARD™

303 should be applied to Sunbrella® fabrics after each thorough cleaning, which typically removes the original finish and reduces the fabric's water repellency.

- Clean Sunbrella® fabric, using one of the suggested cleaning methods.
- Allow Sunbrella® to completely air dry.
- Apply 303 High Tech Fabric Guard™ in a well-ventilated area following instructions on the container.
- Apply 303 in a thin, even coat and allow fabric to dry completely.
- Apply a second thin, even coating of 303. (Two light coatings are more effective in restoring fabric water resistance than a single heavy coating.)
- A 15-ounce bottle provides coverage of up to 50 square feet of fabric.)

For more information, visit www.303products.com.

PROFESSIONAL CLEANERS

In evaluating the services of a professional firm, you should inquire about the firm's experience in working with Sunbrella® fabrics and knowledge of cleaning and re-treatment requirements.

DO NOT dry clean Sunbrella® fabrics.

HELPFUL HINTS

Protect the area around your Sunbrella® fabric when using a bleach solution — bleach may discolor non-Sunbrella® fabrics. Always rinse Sunbrella® thoroughly to completely remove bleach.

Sunbrella® fabric air-dries very quickly. Machine drying is not necessary.

If fabric has some wrinkling, use an iron, if necessary, but only on the synthetic* setting. As some irons exceed the recommended 100°F/38°C temperature on the synthetic setting, test a small, inconspicuous area before ironing entire piece.

DO NOT use a steamer or iron set to steam setting.

**Synthetic fabric heat settings normally do not exceed 150°F/66°C.*

Sunbrella® Stain Chart

This chart contains our recommended cleaning methods of Sunbrella® fabric for some of the most common and toughest stains. You may also use Carbona™ Stain Devil cleaning products. Available from national retailers, Carbona™ provides 9 formulas made to get out different types of stains. Apply the number indicated for your stain.

By maintaining the appearance of your Robert Allen® fabric and following a few guidelines to ensure it is properly cared for, you can prolong its use and prevent wear.

CARE INSTRUCTIONS

Because window glass magnifies the sun's rays regardless of the season, it is important to protect your fabrics from the sun. One option is to employ trees and shrubbery to help eliminate sunlight. Otherwise, draw your shades during the day or use awnings when possible to block the sun's rays. In addition, colors can also fade through oxidation, or gas fading, so it is important not to keep your Robert Allen® fabrics in storage for a long period without airing it out. If you are using Robert Allen® fabrics for draperies or drapes, line and interline to prevent fading.

It is important to vacuum your Robert Allen® fabrics often to remove dust and other substances. Also, try to dry clean your fabrics at regular intervals so impurities do not collect. Do not try to remove any spots or stains yourself.

Because most fabrics breathe and retain moisture, few fabrics are constant. This often results in fabric stretching or shrinking as much as 3 percent in length. To prevent even greater changes, do not place your fabrics around heating and cooling vents.

While a finish does not eliminate the necessity of properly caring for fabrics, they often help fabrics resist spotting. Generally, light colors are likely to benefit the most. However, if a stain occurs, it should be given immediate attention by a professional dry cleaner.

Outdura® Care & Cleaning Overview

To avoid dirt from collecting, regularly clean your Outdura® fabric. By simply removing excess soil by lightly brushing your fabric or washing the area with tepid water, you can increase the lifespan of your fabrics.

OUTDURA® INDOOR/OUTDOOR FURNITURE GRADE FABRIC

- To uphold the appearance of your fabric, brush often, clean spills as they arise and spot-clean stains.
- If you wish to hand wash your removable covers, soak the fabric in a gallon of lukewarm water and gently scrub using a sponge or brush. If necessary, add a ¼ cup of mild soap. Be sure to rinse the area completely to remove all residues and allow your fabric to air dry.

- Mist upholstered fabrics with water and mild soap to spot clean. If needed, gently scrub with a sponge or brush. Rinse the piece completely to eliminate all residues and then allow the fabric to air dry. If desired, you may also blot or use a wet-vacuum to decrease drying time.
- To clean more thoroughly, gently scrub your fabric with a mixture of lukewarm water and a mild natural soap, such as Ivory brand soap. Afterward, rinse the area completely to remove any residue.
- To remove stubborn stains or mildew, mix 1 cup of bleach, ¼ cup of mild soap, and a gallon of water. Allow the stained area to soak for 20 minutes prior to gently scrubbing with a sponge or clean towel. Be sure to rinse the area thoroughly and allow the fabric to air dry.
- For light cleaning, mix ¼ cup of mild soap and a gallon of tepid water. Allow the mixture to soak the fabric. Be sure to rinse the area completely and allow your fabric to air dry.
- To spot-clean a removable cover, mist the area with a mixture of water and mild soap, then scrub forcefully with a sponge or brush. Rinse the area completely to remove all residues, then allow the fabric to air dry or blot dry with a wet-vacuum.
- Do not dry clean or steam your Outdura® fabrics. When necessary, use an iron with a synthetic fabric heat setting.
- **Do not machine-wash.**

OUTDURA® DIFFICULT STAIN REMOVAL

RETURN & SHIPPING POLICY

Custom orders, special orders, fabric-by-the-yard orders and closeout orders are **non-returnable and cannot be cancelled** once placed due to the custom and made-to-order processes involved. Personalized or logo/company promotional products cannot be returned for any reason.

Any problems or concerns with custom-made products must be reported within 15 business days of receipt. Our workmanship is guaranteed within 6 months of receipt of your custom-made product. Please contact customer service with your concerns. For more information, please read our Terms & Conditions.

If, for whatever reason, you are not completely satisfied with your purchase of a non-custom product (one not made to your specific dimensions and fabric choice), you may return **UNUSED, RESALEABLE** products to us for a refund, exchange, or company credit, provided you notify us to receive a Return Authorization code, and we receive the item back in our warehouse within 12 days of the original date of delivery. A restocking fee of 25% will apply.

International orders shipped via a freight forwarder to points outside the continental United States are **non-returnable**.

Order shortages, damages or discrepancies must be claimed within 2 business days of receipt of order. All returns and refunds are subject to final approval from Designer Custom Source's Customer Service Department. A 25% restocking fee may apply depending on the quantity and style of items being returned.

If an order is refused, shipping charges are non-refundable and all restocking fees will still apply. If a customer refuses a package, they will be charged for any costs we incur in

having the packages returned to us. If a customer refuses a personalized, non-refundable item, they cannot receive any credits by simply refusing the delivery, and they will be charged an additional charge for any return fees we incur after the package is refused. The refused package shall remain in the possession of Designer Custom Source until such time as the customer remits payment for us to send the item(s) again. If payment is not received within 30 days of the first failed delivery, then the item is forfeited.

Shipping charges are non-refundable.

Items with Free Shipping

Returns on items that included 'Free Shipping' will be credited for the item **ONLY** minus the original shipping charges we incurred to ship the item(s) out to you and restocking fees will still apply. 'Free Shipping' will no longer apply once the item is returned. You will be responsible for the return shipping charges, as well as the shipping charges to send your replacement item.

Damage in Shipping

Please check your order immediately upon receipt and notify us if the item has been damaged. Please report the damage within 48 hours to our Customer Service Department during normal customer service hours. We will need photos of the damaged item, as well as photos of the box in which the damaged item was shipped. Please email us images no larger than 300k each. Photographs, sized 4" x 6", can also be mailed to our corporate offices if you are unable to email them. We must have the images in order to notify the shipping company and file the necessary damage claims. After claim is presented to the shipping company, we will arrange to have damaged items and their packaging inspected, returned and replaced.

IMPORTANT: Please keep original shipping containers and packaging in which your item was received, as they are needed for inspection.

Incorrect Shipping Information

Please verify shipping address(es) before placing your order(s). If incorrect shipping information is submitted, you will be responsible for any fees associated with redirecting your deliveries and/or lost merchandise.

Custom Cushion Shipping

Please be advised that your cushion will be folded for shipment if:

- Cushion thickness is less than 4" and the length exceeds 106"
- Cushion thickness is less than 4" and if the length added to the girth [2 x (L + W)] exceeds 129"

Custom Orders & Closeout Items

Customized and custom-made items cannot be returned. These are orders by which the customer chooses the color design, frame, custom cut fabric, logo/personalized products, etc. Designer Custom Source will make a fair attempt to offer alternatives that address your concern. Items marked Closeout are not returnable — they are first quality but are no longer manufactured or stocked at Designer Custom Source. Closeout and sale items are not returnable or exchangeable.

Product Returns

International orders shipped via a freight forwarder to points outside the continental United States are **non-returnable**.

STOCKED INVENTORY (NON-CUSTOM)

If you are unsatisfied with your purchase, our Customer Service Department will assist you within 3 business days with the proper return approval and shipping instructions. Items will be subject to a factory restocking charge of 25% depending on the quantity and style of items being returned. To avoid restocking fees, you can opt to send back your original purchase and exchange for equal or higher value exchange. Restocking fees are charged to handle our administration fees of the return which include but are not limited to the following:

1. The Return Authorization
2. Manual Inventory Update in our System
3. Receiving of the Return, and
4. Restocking in Our Warehouse.

Customers are responsible for returning the item in the original shipping containers and in saleable condition. Credit will be given for the price of the item only. Credit is not issued for shipping charges. If the return item was a part of the Free Shipping and Handling promotion, the eligible refund amount will be the purchase price minus our shipping cost. Claims will not be made on items improperly or insecurely packaged. Credit will be issued when we receive the returned item in good condition at the factory.

Warranty Returns

To return items that meet our warranty guidelines, refer to our return procedures for complete instructions.

RETURN PROCEDURES

In order to process your warranty claim, please follow these procedures so that we may expedite our service to you:

- Notify Designer Custom Source of the concern with your product(s).
- A Designer Custom Source employee will assist you with processing your claim.
- If the concern is covered under warranty, Designer Custom Source will direct you to either return the product or part to our corporate headquarters in Montgomery, Alabama.
- The return will not be accepted without a Return Authorization Number that a Designer Custom Source customer service representative will provide to you.
- You will be provided an address to which you can return your order. An entire replacement, replacement part, or repaired product will be sent to you after the return is verified by a Designer Custom Source customer service representative.
- If a problem occurs after the warranty period, you may request a repair or replacement quote after inspection of the damage. Freight charges both ways will be your responsibility.
